*Transnational & Multinational Corporations in the Global Economy* Peter Lowe, 2020-06-27 This book 1st edition published in June 2020 examines the factors behind the growth of transnational corporations TNCs and multinational corporations MNCs and how they have become a major force in the increasing interdependence of national economies through their role in international trade investment and capital TNCs including sudden tax rises the removal of licences or even the expropriation of their assets Chapters Characteristics Spatial Organisation of TNCs MNCs Reasons for the Growth of TNCs MNCs Impacts of TNCs MNCs on Host Countries Impacts of TNCs MNCs on the Country of Origin Role of TNCs MNCs Nation States in Globalisation Case Study of Apple Inc Case Study of BP plc Case Study of Dyson Ltd Numerous discussion questions and multiple choice review questions are included along with graphs and photos to create a more interactive and educational experience for the reader It will be of relevance to A Level and IB Geography teachers and students as well as anyone with an interest in the nature and impacts of transnational multinational corporations and their role in the global economy

**Multinational Firms in the World Economy** Giorgio Barba Navaretti, Anthony Venables, Frank Barry, 2004 Presenting a debate on multinationals that is grounded in sound economic arguments the authors explain their conclusion that multinational enterprises are generally a force for the promotion of prosperity in the world economy

**China and the Multinationals** R. Pearce, 2012 This original and important book explores how the interaction between China and multinational enterprises MNEs has the potential to affect the future of the Chinese economy the global economy and international business It examines the interaction of two of the most important forces affecting the development of the global

economy in recent decades firstly the opening and massive growth of the Chinese economy and secondly the rise in foreign direct investment per se and the consequent strategic restructuring of major MNEs. The expert contributors begin by investigating precisely how leading MNEs with well honed international practices and commitments have drawn their subsidiaries in China into their established networks. They suggest that MNEs operations are increasingly embedded in the growth and sustainability of the Chinese economy itself rather than merely serving as a supply base for their global markets. The second part of the book examines the emergence of new MNEs from China itself. It shows how these MNEs are seen as integral to China's development and how their ability to expand reflects strengths from China's growth as well as revealing the growing needs required for sustainability. This timely study will be of great interest not just to those following one of the world's key economies but also to researchers and students of the fast paced changes in international business strategy.

Handbook on Small Nations in the Global Economy D. van den Bulcke, Alain Verbeke, Wenlong Yuan, 2009. These studies of the international competitiveness of small open economies demonstrate the critical importance of foreign direct investment as an engine of economic development. Multinational enterprises are the key drivers of international competitiveness. Alan M. Rugman, University of Reading, UK. Globalization has made every country small. The global economic crisis has made sure that every country has increasingly realised that it is open and vulnerable as well. This volume is both timely and relevant. Small country studies should become mainstream for scholars in business economics and politics. Rob van Tulder, RSM Erasmus University, the Netherlands. This book provides a fresh and clear eyed view of the relationship between multinationals and location advantages of countries. It is one of the first attempts to build a constructive bridge between the theory of international business and the outstanding contribution of Michael Porter about the drivers of competitiveness. The authors address crucial issues demanding the attention of teachers, researchers, practitioners and political leaders. Philippe Gugler, University of Fribourg, Switzerland. This unique, extensive Handbook illustrates that multinational enterprises can contribute substantially to the competitive advantage of small countries. It advances the notion that small nations increasingly need to rely on both home grown and foreign multinational enterprises to achieve domestic economic success in industries characterized by international competition. The expert contributors explore the roles of firms in a range of small, successful open economies driven by such multinational enterprises across the globe. They juxtapose country data sets against Professor Michael Porter's paradigm of single diamond components and show that these single diamond components reflect merely a set of initial conditions which can be improved upon through both inward and outward direct investment. Concluding that multinational enterprises create resource linkages between the home and host environments in which they operate, this Handbook proves to be a fascinating read for academics, students and researchers with an interest in business and management economics and international economics.

The Global Factory Peter J. Buckley, 2018-02-23. This key new book synthesises Peter Buckley's work on the global factory, the modern networked multinational enterprise. The role of interfirm

networks entrepreneurship and cooperation in the creation and management of global factories leads to a discussion of their governance internal knowledge transfer strategies and performance including their role in potentially combating societal failures Emerging country multinationals are examined as a special case of global factories with a focus on Indian and Chinese multinationals their involvement in tax havens and offshore financial centres the performance and processes of their acquisition strategies all seen as key aspects of globalisation *The Globalization of Multinational Enterprise Activity and Economic Development* N. Hood,S. Young,1999-10-21 This book explores and analyzes the effects of the globalization strategies of multinational enterprises MNEs on national and local development and highlights the implications of these effects for policy makers Containing contributions from leading international business scholars the text addresses this previously little explored but critically important issue for the future of the world economy

**Exploring the Global Economy** Raymond Vernon,1985-08-12 This wide ranging collection of previously published articles by Raymond Vernon reflects a portion of the diverse subjects on which he has worked during his career In the past 20 years the author has pioneered the study of two major economic institutions which have played important roles in today s global economy the multinational corporation and the state owned enterprise His recent thoughts on these subjects are well represented in this volume Co published with the Harvard Center for International Affairs

*Multinationals and Economic Geography* Simona Iammarino,Philip McCann,2013-01-01 The world economy is subject to a rapidly increasing globalization and multinational enterprises are their major driving force This brand new book on multinationals and economic geography by two world leading economic geographers is a landmark that provides an integrated and dynamic perspective on the economic geography of the multinational enterprise To fully understand this process of globalization the book explains forcefully and persuasively that one needs a dynamic perspective on multinational enterprises that brings together disparate literatures on economic geography knowledge and innovation global network cities and international business and management

Embedding it in modern theory of innovation and geography the book provides not only a state of the art of theories and empirics on the location of multinationals but goes far beyond that This book is an absolute must read for any scholar and any student that is interested in multinationals and their location Ron Boschma Utrecht University The Netherlands and Lund University Sweden Despite often playing second fiddle to clusters in the economic geography literature multinationals are fundamental drivers of economic development As generators and diffusers of knowledge they have played an essential role in shaping the new world economic order No book captures this better than Simona Iammarino and Philip McCann s *Multinationals and Economic Geography* a must read for anyone eager to fully understand the new economic geography of globalisation Andr s Rodr guez Pose London School of Economics UK After more than fifty years of systematic research on multinational enterprises MNEs what is apparent is that there is as yet no unified or dominant theory of the MNE The objective of this book is to bring into focus one particular dimension of MNE behaviour and activity that has been relatively

under researched namely the geography of the multinational enterprise as understood through the lens of innovation and technological change The authors clearly demonstrate that geography is becoming increasingly important for MNEs and in turn MNEs are becoming progressively more important for economic geography The pivot on which this vital relationship turns is the creation diffusion and management of new knowledge This unique book will prove a fascinating read for academics students and researchers across a broad range of areas including geography economic geography regional science international business and management innovation studies economic development Professionals such as corporate managers and policymakers in these fields would also find this book to be of great interest

**Industrial Competitiveness** John H. Dunning, Rajneesh Narula, 2005-01-01 This book provides an excellent overview of the changing relationship between multinationals and economic development as globalization has taken off and substantially altered the conditions for catching up as opposed to falling behind The authors move very effectively between the discussion of concepts that are crucial to understanding such changes and various empirical evidence on foreign direct investment trade inter firm relationships institutional settings and competitiveness John Cantwell Rutgers University US The globalisation of the world economy has undermined many of the old certainties regarding foreign direct investment flows Dunning and Narula use the concepts of alliance capitalism and technological evolution to analyse recent trends in international business They identify the challenges to government policymakers from regional integration and the consequent intensification of political competition to attract high technology investment This masterful and incisive analysis brings great clarity to perplexing issues and delineates a cogent industrial policy agenda for a globalised economy Mark Casson University of Reading UK This book offers an important contribution to the contemporary debate on the role of multinational enterprises MNEs in economic development in an increasingly globalizing knowledge intensive and alliance based world economy Each of the chapters touches upon critical issues now facing the global economy They also address the growing importance of innovative activities of firms in promoting economic development and industrial restructuring as well as the role of FDI and cooperative agreements in furthering this goal Emphasis is placed on the increasingly significant role of national governments in promoting the intellectual capital of their indigenous resources and capabilities and of inter firm collaborative alliances Globalization and technological advances are reconfiguring the ingredients of the competitiveness of firms and nation states They are emphasizing the increasingly important role of both private and social institutions as determinants of the success of corporations and of the economic development of societies Covering a range of issues from economic development alliance capitalism government policies regional integration and industrial development this authoritative book will greatly appeal to academics and economists especially those interested in international business and management

Multinationals and Global

Capitalism Geoffrey Jones,2005 This book provides a unique contribution to contemporary globalization debates by providing an accessible survey of the growth and role of multinational enterprises in the world economy over the last two hundred years The author shows how entrepreneurs built a global economy in the nineteenth century by creating firms that pursued resources and markets across borders It demonstrates how multinationals shifted strategies as the first global economy disintegrated in the political and economic chaos between the two world wars and how they have driven the creation of the contemporary global economy Many of the issues of the global economy have been encountered in the past This book shows how entrepreneurs and managers met the political ethical cultural and organizational challenges of operating across national borders at different times and in different environments The role of multinationals is placed within their wider political and economic context There are chapters on the impact of multinationals and on relations with governments The focus on the shifting roles of firms and industries over time rather than abstract trade and capital flows provides compelling evidence on the diversity and discontinuities of the globalization process The book explains the history of multinationals across a wide spectrum of manufacturing service and natural resource industries from an international perspective which ranges widely across different countries It provides an essential historical framework for understanding global business An accessible survey of the history of international business worldwide this book will be key reading for students taking courses in International Business Business History Multinationals and Entrepreneurship and of interest to academics and researchers working in these areas

**Regional Strategies in a Global Economy** René Haak,Dennis S. Tachiki,2004 Both proponents and opponents of globalization assume it is a process that sweeps across national borders Indeed over the last twenty years the key features of globalization provide *prima facie* evidence for this conventional wisdom Dramatic developments in information and communications technology the rise of global companies and production networks the unstoppable internationalization of financial markets and the deregulation and privatization of service sectors are all important examples of how this process unfolds in its raw form Nevertheless the increase in regional economic activity is another striking feature of this process As multinational corporations extend their global reach regional networks also emerge in the global trading system Globalization therefore does not only mean a global convolution of economies but could also lead to a spatial concentration of economic activity All through the 1990s and at the beginning of the new century East Asia experienced numerous structural changes leading to interesting market developments South Korea's rise to developed country status the integration of the Southeast Asian economies and the rise of China have made this region the manufacturing center of the global economy Considering the economic importance of Japan and the other East Asian nations in the world the crucial questions that arise include What are the linkages between the global strategies of multinational corporations and their regional business operations Why do subregional strategies emerge especially recently to take advantage of China as a production base and market Are the modern business practices in a multinational corporation's home country easily

transferred to their overseas operations and are they readily absorbed by local employees Finally which strategic directions are Japanese American East Asian and European enterprises going in this important business area of the world To answer these questions this book takes a closer look at several structural features of the East Asian economy and the corporate and business strategies of multinational corporations The volume assembles up to date research by a number of European Australian and Japanese scholars and presents analysis of various business aspects of regional strategies in a global economy

**Transnational & Multinational Corporations in the Global Economy** Peter Lowe,2025-11-06 This updated book 2nd edition published in November 2025 examines the factors behind the growth of transnational corporations TNCs and multinational corporations MNCs and how they have become a major force in the increasing interdependence of national economies through their role in international trade investment and capital TNCs MNCs have undoubtedly become key players in the process of globalisation and vital to the economic development of emerging economies during recent decades Yet the geography of their ownership is also changing The domination of the USA and Europe as origins of the world's largest companies is being challenged by the emergence of powerful corporations from the newly industrialised countries of Asia particularly South Korea India and China The activities of TNCs MNCs inevitably lead to significant economic social and environmental consequences for their host countries as well as on their own country of origin Both positive and negative impacts are assessed while case studies of Apple BP and Dyson provide additional detailed examination of the characteristics spatial organisation growth and impacts of three global corporations Although they differ in their history and geographical origins product lines and scale of operations they share a number of common features with each other particularly in how their growth has facilitated and exploited the opportunities arising from the process of globalisation New or updated content in this edition Latest socio economic and environmental data on TNCs MNCs for the period 2020 2025 Fully revised case studies of Apple BP and Dyson with updated data covering the period 2020 2025 Additional photos maps and graphs Numerous discussion questions and multiple choice review questions are included along with graphs and photos to create a more interactive and educational experience for the reader It will be of relevance to A Level and IB Geography teachers and students as well as anyone with an interest in the nature and impacts of transnational multinational corporations and their role in the global economy

[Small and Medium-Sized Enterprises in the Global Economy](#) Zoltan J. Acs,Bernard Yeung,1999-04-28 DIVExplores how and why small and medium sized businesses are flourishing in the global marketplace div *The Rules of the Game in the Global Economy* Lee E. Preston,Duane Windsor,2013-11-11 This study has been long in the making and the world has changed dramatically while we have been at work We initially anticipated a substantial section on the Soviet dominated Council for Mutual Economic Assistance CMEA or COMECON which offered an interesting contrast to the kind of international business regime typically found among market oriented countries and industries As we moved toward publication the CMEA vanished and so we mention it only in passing The USSR subsequently disintegrated into a

Commonwealth of Independent States CIS On the other hand we began with the assumption that the historic rule of capture no long played a significant role in international economic relations The seizure of Kuwait s territory and wealth by the government of Iraq suggests that this assumption was heavily influenced by wishful thinking Even though this seizure has been reversed by military action the experience remains a challenge to generally held beliefs about the strength of order versus chaos in contemporary international affairs Some readers of this volume have suggested that it gives insufficient attention to the fact that many of the important business and economic regimes of the postwar period are currently under significant pressure perhaps even in danger of collapse We acknowledge that there are many evidences of strain in for example the free trade and money exchange regimes and in many areas of environmental protection
