## **Multinational Federations Routledge Studies In Federalism And Decentralization:**

Multinational Federations Michael Burgess, John Pinder, 2007-04-11 This is the first comparative volume available on multinational federations bringing together an international range of experts on federalism. Multinational federations are federal states intended to provide a framework that can accommodate, manage and resolve some of the most intractable political conflicts of our time that emerge from identity politics those that stem from competing national visions whether within or between established states. Featuring key experts in the field such as Michael Burgess, Alain Gagnon and Ronald Watts this unique book draws on a wide geographical range of country studies including Belgium, Canada, India, Malaysia, Spain, Russia, Cyprus, India, Switzerland and the EU in order to illustrate the pivotal relationship between federalism and nationalism. In so doing it addresses the practical relevance of federalism to the new political recognition of difference and diversity in the specific form of national minoritarianism. Multinational Federations will be of strong interest to students and researchers of federalism, democracy and nationalism.

## **Emerging Practices in Intergovernmental Functional Assignment**

**Assignment** Gabriele Ferrazzi, Rainer Rohdewohld, 2017-06-26 Attaining the benefits of especially fiscal decentralization in government remains an enduring challenge in part because the re arrangement of public functions across levels of government has often been carried out poorly. This book aims to provide a firmer conceptual basis for the re arrangement of public functions across levels of government. In doing so it offers practical advice for policy makers from developing and emerging countries and development cooperation practitioners engaged in such activity. Combining a theoretical approach for inter governmental functional assignment with an in depth analysis of real life country cases where functional assignment FA has been supported in the context of international development cooperation it underscores the common technical and political challenges of FA and also demonstrates the need to expect and support country made and context specific solutions to FA processes and results. Examples are drawn from a number of developing transition countries from the Asia Pacific region, Africa and the OECD which outline and suggest advisory approaches, tools, principles and good practices and approaches. This text will be of key interest to scholars, students, policy makers and practitioners in public policy, decentralization, local governance studies, public administration and development administration studies. *From Empire to Federation in Eurasia* Ivan Sablin,Egas Moniz Bandeira,2026-02-12 Bringing together nine chapters penned by experts in different area studies From Empire to Federation in Eurasia investigates how empires and postimperial regimes including the Ottoman Russian Habsburg Qing Republican Chinese Japanese and Siamese polities grappled with the challenges of diversity decentralization and self determination

Paying attention to both vernacular models and external inspirations it reframes the study of state building beyond the Western European and North American contexts Federalist and autonomist designs served to restructure diversity

management shifting from vertical imperial rights regimes to more horizontal arrangements often resulting in asymmetric federalism Although in many cases exclusionary nationalism and centralization triumphed the diverse visions reveal

alternative trajectories of post imperial and post colonial transformations A major contribution to the global history of concepts institutions and political practices this book will appeal to scholars and students of global and international history

political science and area studies including Eastern European Eurasian East Asian Middle Eastern and South Asian studies

Federalism and Decentralisation in Eastern Europe Miodrag A. Jovanović,Slobodan Samardžić,2007 Although fully aware of the gravity of violent ethnic wars and challenges that multiethnic societies pose for any democratic polity both authors

endorse multicultural democracy Jovanovic argues against territorial accommodation of ethnic demands and in favour of community based minority rights policy Samardzic understands territorial decentralisation as an indispensable guarantee for a fully fledged protection of minority ethnic groups Despite this major conceptual difference they put forward democratic

legitimacy as a fundamental condition for peaceful multiethnic societies

Gagnon,2009-09-10 Throughout the world liberal democracies are grappling with increasing claims made in the name of minority national socio cultural and ethno cultural identities that seek greater recognition in the institutions of the nation state This work inserts itself into debates centred on diversity through a normative and empirical analytical assessment of the political sociology of multinational democracies The main thread of the arguments put forward is that federalism in both its institutional manifestations and its sociological properties constitutes a promising avenue for the management of cohabitating political communities and for the affirmation of collective identities within states that are constituted by two or more nations Author Alain G Gagnon develops his argument by contending that the federal principle allows for the exercise of advanced democratic practices within nation states permitting internal nations to openly affirm the bases of adherence to a common political project At the same time he argues that federalism nourishes the development of distinct collective traditions that serve to benefit all parties to the association It is concluded that only in such a scenario will the elusive pursuit of an authentic and shared loyalty underpin multination states and ensure their stability in contrast to the instrumental sentiments of belonging engendered by procedural territorial federal models Focusing primarily on the Canadian case this book also draws inspiration from other federal states Belgium the United States as well as federalizing states Spain the United Kingdom It will be of keen interest to students and scholars of Politics European Studies along with Nationalism and Federalism Studies **Multinational Federalism and Value Pluralism** Ferran Requejo,2004-08-02 This book addresses the issue of whether or not federalism be a fair and workable way of articulating multinational societies according to revised liberal democratic patterns Perspectives on Fiscal Federalism World Bank,2006 This book addresses a variety of issues relating to intergovernmental finance and the provision and financing of local services including budgeting and financial management the institutional framework for the conduct of intergovernmental relations appropriate methods of service delivery in metropolitan agglomerations and remote rural areas local government enterprises user charges property taxes income and value added taxes natural resource taxes and local business taxes Throughout the authors draw on experience both in Canada and in other decentralized ountries and consider to varying extents the special problems facing Russia and other large transitional economies

**Community, Scale, and Regional Governance** Liesbet Hooghe,Gary Marks,2016-08-18 This is the second of five ambitious volumes theorizing the structure of governance above and below the central state This book is written for those interested in the character causes and consequences of governance within the state The book argues that jurisdictional design is shaped by the functional pressures that arise from the logic of scale in providing public goods and by the preferences that people have regarding self government The first has to do with the

character of the public goods provided by government their scale economies externalities and informational asymmetries The second has to do with how people conceive and construct the groups to which they feel themselves belonging In this book the authors demonstrate that scale and community are principles that can help explain some basic features of governance including the growth of multiple tiers over the past six decades how jurisdictions are designed why governance within the state has become differentiated and the extent to which regions exert authority The authors propose a postfunctionalist theory which rejects the notion that form follows function and argue that whilst functional pressures are enduring one must engage human passions regarding self rule to explain variation in the structures of rule over time and around the world Transformations in Governance is a major new academic book series from Oxford University Press It is designed to accommodate the impressive growth of research in comparative politics international relations public policy federalism environmental and urban studies concerned with the dispersion of authority from central states up to supranational institutions down to subnational governments and side ways to public private networks It brings together work that significantly advances our understanding of the organization causes and consequences of multilevel and complex governance The series is selective containing annually a small number of books of exceptionally high quality by leading and emerging scholars The series targets mainly single authored or co authored work but it is pluralistic in terms of disciplinary specialization research design method and geographical scope Case studies as well as comparative studies historical as well as contemporary studies and studies with a national regional or international focus are all central to its aims Authors use qualitative quantitative formal modeling or mixed methods A trade mark of the books is that they combine scholarly rigour with readable prose and an attractive production style The series is edited by Liesbet Hooghe and Gary Marks of the University of North Carolina Chapel Hill and the VU Amsterdam and Walter Mattli of the University of Oxford *Minority Nations in Multinational Federations* Min Reuchamps, 2014-12-17 Multinational federations rest on the coexistence of two or more nations within a single polity Within these federations minority nations play a significant role as their character differs from the other building blocks of the federation This edited volume offers a comprehensive comparison of two such minority nations Quebec in Canada and Wallonia in Belgium which exemplifies many dimensions themes and issues highly resonant to the study of federalism and regionalism across the globe Quebec and Wallonia have experienced several decades of federal dynamics where both regions have had to find their way as a minority nation in a multinational federation For those studying federalism and regionalism their importance lies in a number of characteristics but principally in the fact of these minority nations have transformed into mini states with fully fledged legislative powers within their federation This book seeks to study the specific dynamics within these small worlds and between them and the rest of the federation This text will be of key interest to students and scholars of federalism nationalism and regionalism comparative politics and policies political ideas and social movements

### **Minority Accommodation through Territorial and Non-Territorial Autonomy** Tove H. Malloy,Francesco Palermo,2015-10-08

Minority Accommodation through Territorial and Non Territorial Autonomy explores the relationship between minority territory and autonomy and how it informs our understanding of non territorial autonomy NTA as a strategy for accommodating ethno cultural diversity in modern societies While territorial autonomy TA is defined by a claim to a certain territory NTA does not assume that it is derived from any particular right to territory allocated to groups that are dispersed among the majority while belonging to a certain self identified notion of group identity In seeking to understand the value of NTA as a public policy tool for social cohesion this volume critically dissects the autonomy arrangements of both NTA and TA and through a conceptual analysis and case study examination of the two models rethinks the viability of autonomy arrangements as institutions of diversity management This is the second volume in a five part series exploring the protection and representation of minorities through non territorial means examining this paradox within law and international relations with specific attention to non territorial autonomy NTA

### Routledge Handbook of Regionalism & Federalism John Loughlin,John Kincaid,Wilfried Swenden,2013-07-18

Almost all states are either federal or regionalized in some sense It is difficult to find a state that is entirely unitary and the Routledge Handbook of Regionalism and Federalism necessarily takes in almost the entire world Both federalism and regionalism have been subjects of a vast academic literature mainly from political science but sometimes also from history economics and geography This cutting edge examination seeks to evaluate the two types of state organization from the perspective of political science producing a work that is analytical rather than simply descriptive

The Handbook presents some of the latest theoretical reflections on regionalism and federalism and then moves on to discuss cases of both regionalism and federalism in key countries chosen from the world's macro regions. Assembling this wide range of case studies allows the book to present a general picture of current trends in territorial governance. The final chapters then examine failed federations such as Czechoslovakia and examples of transnational regionalism the EU, NAFTA and the African Union. Covering evolving forms of federalism and regionalism in all parts of the world and featuring a comprehensive range of case studies by leading international scholars this work will be an essential reference source for all students and scholars of international politics, comparative politics and international relations.
