In general, the more money there is to be won, the higher the winning probability, even when more people contribute than the average. This is most dramatic in lotteries, where the odds are good.

- This has important point for our analysis. This is simply true that data will be consistent.
- So a hypothesis testing approach goes something like: reject the null hypothesis if the sample mean is significantly different from the population mean.
- So, if $H_0: \mu = 100$ is the hypothesis, then a null hypothesis testing approach will be to test the null hypothesis.
- So a hypothesis testing approach is often called a hypothesis testing with the null hypothesis.
