Teaching and Computers ,1983 **The Ice-Cream Sundae Guide to Autism** Debby Elley,Tori Houghton,2020-06-18
Autism is a bit like an ice cream sundae There are lots of ingredients that go into it There are so many types of sundae
glasses out there Some are plain and simple some are loud and proud In fact sundae glasses are a bit like people we re all
different Because we all have different personalities autism doesn t look the same in everybody This picture led book uses ice
cream sundae ingredients to represent various aspects of autism such as sensory differences special interests or rigidity of
thinking explaining the different facets of autism in a neutral way The reader can create their own individual ice cream
sundae to illustrate their personal strengths and challenges highlighting how it makes them unique and helping to build
confidence and self awareness It includes colourful illustrations and workbook activities to help children cement their
understanding of autism **Multiplication Facts Math Worksheet Practice Arithmetic Workbook with Answers**
Shobha,2016-04-07 This book has more than 3100 multiplication facts for daily practice by students Each page has 2
different sets consisting of 18 problems each It is recommended for students to attempt 1 set daily for consistent practice
Book starts and ends with times table charts for easy reference followed by some quick multiplication facts Once students
start gaining confidence in individual facts they can attempt mixed facts Book can be used to track practice time for each set
Date and time can be recorded at top of each page Answer to each problem is given at the end of the book Knowing
multiplication facts is helpful not only in academics we frequently use multiplication in our daily lives too Just like learning to
walk before you can run learning multiplication and familiarizing yourself with numbers are building blocks for other math
topics taught in school such as division long multiplication fractions and algebra Mastering the basic math facts develops
automaticity in kids Automaticity is the ability to do things without occupying the mind with the low level details that are
required this is usually the result of consistent learning repetition and practice For instance an experienced cyclist does not
have to concentrate on turning the pedals balancing and holding on to the handlebars Instead those processes are automatic
and the cyclist can concentrate on watching the road the traffic and other surroundings Until students have developed
sufficient sensory cognitive tools supporting access to symbolic memory they will not be able to image store or retrieve all of
the basic facts with automaticity Therefore students need a comprehensive developmental and multi sensory structured
system for developing automaticity with the facts **Multiplication Made Easy** Mathyz Learning,2018-12 This book has

more than 4000 multiplication facts for daily practice by students Each page has one set consisting of 45 problems It is recommended for students to attempt 1 set daily for consistent practice Book starts with times table charts for easy reference followed by some quick multiplication facts Once students start gaining confidence in individual facts they can attempt mixed facts Book can be used to track practice time for each set Date and time can be recorded at top of each page Answer to each problem is given at the end of the book Knowing multiplication facts is helpful not only in academics we frequently use multiplication in our daily lives too Just like learning to walk before you can run learning multiplication and familiarizing yourself with numbers are building blocks for other math topics taught in school such as division long multiplication fractions and algebra Mastering the basic math facts develops automaticity in kids Automaticity is the ability to do things without occupying the mind with the low level details that are required this is usually the result of consistent learning repetition and practice For instance an experienced cyclist does not have to concentrate on turning the pedals balancing and holding on to the handlebars Instead those processes are automatic and the cyclist can concentrate on watching the road the traffic and other surroundings Until students have developed sufficient sensory cognitive tools supporting access to symbolic memory they will not be able to image store or retrieve all of the basic facts with automaticity Therefore students need a comprehensive developmental and multi sensory structured system for developing automaticity with the facts
