

## Scheduled maintenance chart: operations to be carried out by the Customer

### **Important**

Using the motorcycle under extreme conditions, such as very damp and muddy roads or dusty and dry environment, could cause above-average wear of components like the drive system, the brakes or the air filter. If the air filter is dirty, the engine could get damaged. Therefore, this might translate in required service or replacement of the wear parts earlier than specified in the scheduled maintenance chart.

List of operations and type of intervention [set mileage (km/mi) or time interval *]	Km, x1,000	1
	mi. x1,000	0.6
	Months	6
Check engine oil level		*
Check brake and clutch fluid level		*
Check tyre pressure and wear		*
Check the drive chain tension and lubrication		*
Check brake pads. If necessary, contact your dealer to replace components		*

\* Service operation to be carried out in accordance with the specified distance or time intervals (km, miles or months), whichever occurs first.
