**Logic Load System** Alex Brebeanu, 2010-03 Revolution in Weight training this should really be the title of this book Because the system promoted in this book simply called Logic Load System is the future of training and every single person that goes into a gym from a beginner level up to a high performance athlete will use it as an ultimate system of training a complex tool to enhance their performances with a mathematical precision Logic Load System presents the latest

research in Weight training Whether you are designing a Strength Conditioning routine for a certain sport or a Bodybuilding session Logic Load System will provide you with over 30 methods of manipulating the weight and the repetitions with a mathematical precision in order to give you the best results and also to build up and plan your sessions over a training cycle If so far athletes were just randomly added plates on the bar usually when increasing from one set to another with the same ratio regardless the level of preparation Logic Load System will teach you how to customize the weight and the repetitions according to your level beginner or advanced athlete and stage of preparation preparatory precompetitive competitive or transition At the moment most athletes are using mainly 2 3 methods of increasing and or decreasing the weight from set to set increasing the weight every set increasing the weight every second step increasing and then decreasing the weight Moreover the weight is increased with 5kg 10kg 15 or 20kg as this is pretty much the weight of the plates in most gyms Consequently the athletes are expecting to gradually increase their overall effort which is often a false affirmation If nobody asked themselves why increasing it with 5 10 15 or 20 kg now is the time to do so because there is nothing wrong with 4 12 16 or 18 kg for example Logic Load System will clearly explain you with practical examples and graphs why and how much to increase the weight and gradually increase the overall effort from set to set instead of just randomly throw plates on the bar with no logic in it whatsoever and yet expecting the best results There are no two athletes with perfectly the same level of fitness and therefore the training should be different from athlete to athlete Increasing the weight with 30 kg has a different effect on a beginner athlete as opposed to an advanced athlete Logic Load System will teach you how to customize the weight and the reps to fit your current level of preparation and to prepare you for further improvement Now is the time to stop being a follower It is the time to make it work for you and be in charge of your own progress On the same note most of the athletes are using the same patterns of repetitions when increasing the weight from set to set A common pattern is 12 reps 10 reps 8 reps 6 reps Whether you are aiming for strength power or hypertrophy this is regarded as being the universal answer to achieve the best results one pattern fits all purposes To claim that 4 or 5 sets at a pattern of 12 reps 10 reps 8 reps 6 reps is the best pattern for EVERY athlete is totally illogic To claim that there is only one way to achieve your goal is more than irrational To claim that increasing the weight from set to set with the same ratio regardless the stage and the level of athlete s preparation is totally ignorant This approach has to change and Logic Load System is the only system in the world that will show you why and how to do it Again it is more than sure that is nothing wrong with a pattern of 11 9 7 5 reps for example but I very rarely saw athletes performing this pattern as we tend to perform a pattern of even number of repetitions avoiding the odd numbers repetitions as being to odd As is not only how hard an athlete could train but also how smart Logic Load System will demonstrate you how many reps should be performed and m
