Museum Materialities

Museum Materialities Sandra Dudley, 2013-10-18 This is an innovative interdisciplinary book about objects and people within museums and galleries. It addresses fundamental issues of human sensory, emotional and aesthetic experience of objects. The chapters explore ways and contexts in which things and people mutually interact and raise questions about how objects carry meaning and feeling, the distinctions between objects and persons, particular qualities of the museum as context for person-object engagements and the active and embodied role of the museum visitor. *Museum Materialities* is divided into three sections: Objects, Engagements and Interpretations, and includes a foreword by Susan Pearce and an afterword by Howard Morphy. It examines materiality and other perceptual and ontological qualities of objects themselves, embodied sensory and cognitive engagements both personal and across a wider audience, spread with particular objects or object types in a museum or gallery setting. Notions of aesthetics, affect and wellbeing in museum contexts and creative and innovative artistic and museum practices that seek to illuminate or critique museum objects and interpretations. Phenomenological and other approaches to embodied experience in an emphatically material world are current in a number of academic areas, most particularly strands of material culture studies within anthropology and cognate disciplines. Thus far, however, there has been no concerted application of this kind of approach to museum collections and interactions with them by museum visitors, curators, artists and researchers. Bringing together essays by scholars and practitioners from a wide disciplinary and international base, *Museum Materialities* seeks to make just such a contribution. In so doing, it makes a valuable and original addition to the literature of both material culture studies and museum studies.

Displaced Things in Museums and Beyond Sandra H. Dudley, 2020-11-29 *Displaced Things in Museums and Beyond* looks anew at the lives, effects and possibilities of things. Starting from the perspectives of things themselves, it outlines a particular displacement approach to the museum, anthropology and material culture. The book explores the ways in which the objects are experienced in their present displaced settings and the implications and potentialities they carry. It offers insights into matters of difference and the hope that may be offered by transformative encounters between persons and things. Drawing on anthropological studies of ritual to conceptualise and examine displacement and its implications and possibilities, Dudley develops her arguments through exploration of displaced objects now in museums and dislocated or exiled from their prior geographical, historical, cultural, intellectual and personal contexts. The book's approach and conclusions are relevant far beyond the museum, showing that even in the most difficult of circumstances there is agency, distinction and dignity in the choices and impacts that are made and that things and places, as well as people, have efficacy and potency in those choices. In *Displaced Things*, displacement emerges as fundamental to understanding the lives of things and their relationships with human beings and the places, however defined, that they make and pass within. The book will be essential reading for academics and students engaged in the study of museums, heritage, anthropology, culture and history.
