MUTED GROUP THEORY

Muted group theory (MGT) says that the English language devalues the words, thoughts and experiences of marginalized groups.

KEY ARGUMENTS

1. Language was made by dominant groups, particularly men.

2. Marginalized groups can find it harder to articulate themselves.

3. Marginalized groups have to translate their thoughts before speaking.

EXAMPLE

Kramarae (1981) argues that women are often linguistically subordinated to men.

Women are defined in relation to their husbands (Mrs. X), historically take their husbands' surnames, and tend to be referred to as "Harold's wife" rather than as having their own autonomous identity.

Muted Group Theory Overview:

The Muted Group Theory. An Overview Dennis Nangabo,2015-11-12 Essay from the year 2015 in the subject Sociology Politics Majorities Minorities course Bachelor of Commerce language English abstract The Muted Group Theory was initially proposed by social anthropologists Ardener and Ardener in their book Belief and The Problem of Women The proposers of this hypothesis say that muted groups are those gatherings in the society that have practically no power and that they experience difficulty when communicating or giving out their voice on issues in the society on the grounds that they have less power in participating in the making of the language they use The power rests upon the majority Thus for them to pass their recognitions to the society they should re encode their thoughts and activities to make them comprehended in the general population circle In understanding this theory it just implies that sure minority groups or rather aggregates that are seen to be minority in the society think that it is difficult to communicate in a language that the majority has produced for the overall population This is on the grounds that the language supports the creators over a second or outsider that uses that language The idea of minority or majority can be based on sex age skin shading and religion spot of source or class

Literacy Across Languages and Cultures Bernardo M. Ferdman,Rose-Marie Weber,Arnulfo G. Ramirez,1994-03-08 This book examines the linkage between literacy and linguistic diversity embedding them in their social and cultural contexts It illustrates that a more complete understanding of literacy among diverse populations and in multicultural societies requires attention to issues of literacy per se as well as to improving an educational process that has relevance beyond members of majority cultures and linguistic groups The focus of the book is on the social and cultural contexts in which literacy develops and is enacted with an emphasis on the North American situation Educators and researchers are discovering that cognitive approaches while very valuable are insufficient by themselves to answer important questions about literacy in heterogeneous societies By considering the implications of family school culture society and nation for literary processes the book answers the following questions In a multi ethnic context what does it mean to be literate What are the processes involved in becoming and being literate in a second language In what ways is literacy in a second language similar and in what ways is it different from mother tongue literacy What factors must be understood to better describe and facilitate literacy acquisition among members of ethnic and linguistic minorities What are some current approaches that are being used to accomplish this These are vital questions for researchers and educators in a world that has a large number of immigrants a variety of multi ethnic and multi lingual societies and an increasing degree of multinational activity Beyond addressing applied concerns attending to these questions can provide new insights into basic aspects of literacy **Inter/Cultural Communication** Anastacia Kurylo,2012-07-23 Today students are more familiar with other cultures than ever before because of the media Internet local diversity and their own travels abroad Using a social constructionist framework Inter Cultural Communication provides today s students with a rich understanding of how culture and communication affect and effect each other Weaving
