R. W. Egerton Eastwick,1895 *Handbook of the Logic of Argument and Inference* R.H. Johnson,H.J. Ohlbach,Dov M. Gabbay,John Woods,2002-09-11 The Handbook of the Logic of Argument and Inference is an authoritative reference work in a single volume designed for the attention of senior undergraduates graduate students and researchers in all the leading research areas concerned with the logic of practical argument and inference After an introductory chapter the role of standard logics is surveyed in two chapters These chapters can serve as a mini course for interested readers in deductive and inductive logic or as a refresher Then follow two chapters of criticism one the internal critique and the other the empirical critique The first deals with objections to standard logics as theories of argument and inference arising from the research programme in philosophical logic The second canvasses criticisms arising from work in cognitive and experimental psychology The next five chapters deal with developments in dialogue logic interrogative logic informal logic probability logic and artificial intelligence The last chapter surveys formal approaches to practical reasoning and anticipates possible future developments Taken as a whole the Handbook is a single volume indication of the present state of the logic of argument and inference at its conceptual and theoretical best Future editions will periodically incorporate significant new developments

**Inquiry as Inquiry: A Logic of Scientific Discovery** Jaakko Hintikka,2013-04-17 Is a genuine logic of scientific discovery possible In the essays collected here Hintikka not only defends an affirmative answer he also outlines such a logic It is the logic of questions and answers Thus inquiry in the sense of knowledge seeking becomes inquiry in the sense of interrogation Using this new logic Hintikka establishes a result that will undoubtedly be considered the fundamental theorem of all epistemology viz the virtual identity of optimal strategies of pure discovery with optimal deductive strategies Questions to Nature of course must include observations and experiments Hintikka shows in fact how the logic of experimental inquiry can be understood from the interrogative vantage point Other important topics examined include induction in a forgotten sense that has nevertheless played a role in science explanation the incommensurability of theories theory ladenness of observations and identifiability

**Analyses of Aristotle** Jaakko Hintikka,2006-04-11 Aristotle thought of his logic and methodology as applications of the Socratic questioning method In particular logic was originally a study of answers necessitated by earlier answers For Aristotle thought experiments were real experiments in the sense that by realizing forms in one's mind one can read off their properties and interrelations Treating forms as independent entities knowable one by one committed Aristotle to his mode of syllogistic explanation He did not think of existence predication and identity as separate senses of *estin* Aristotle thus serves as an example of a thinker who did not rely on the distinction between the allegedly different Fregean senses thereby shedding new light on our own conceptual presuppositions This collection comprises several striking interpretations that Jaakko Hintikka has put forward over the years constituting a challenge not
