**The Organic Chemistry of Biological Pathways** John McMurry, Tadhg P. Begley, 2005 Intended for advanced undergraduates and graduate students in all areas of biochemistry The Organic Chemistry of Biological Pathways provides an accurate treatment of the major biochemical pathways from the perspective of mechanistic organic chemistry **The Chemical Biology of Carbon** Christopher T. Walsh, 2023-04-05 Building upon the previous volumes The Chemical Biology of Sulfur The Chemical Biology of Phosphorus and The Chemical Biology of Nitrogen this book examines the organic chemistry of life The Chemical Biology of Carbon It examines chemical biology open to carbon containing natural metabolites that allow both retrospective and predictive behaviours of both biosynthetic and degradative metabolism in primary and secondary pathways This book also notes the centrality of a core set of heterocycles in metabolites and coenzyme forms of vitamins and how that chemistry enables life The organic chemical fundamental considerations are always tied to specific metabolites and metabolic transformations This context makes this volume not a classical organic or even bioorganic approach to organic chemistry in vivo but instead a unique analysis of how the rules and reactivities of organic chemistry underlie the organic chemistry of life The Chemical Biology of Carbon is an ideal reference and guide for medicinal chemists chemical biologists organic chemists as well as postgraduate graduate and advanced undergraduate students in these areas and related disciplines **The Chemical Biology of Human Vitamins** Christopher Walsh, Yi Tang, 2019 This textbook provides a thorough chemocentric view on the key small molecules of life the human vitamins and their active coenzyme forms
