Kreuzer, 1985 It can honestly be said that the scope and magnitude of this meeting surpassed initial expectations with respect to the number and quality of the papers presented Our group has grown since we last met in Dortmund in 1971 This is a good indication that a spiraling of our interests has taken place with the effects of the initial good work felt not just in one corner of the globe but in all four With such a start it was only appropriate that an international society was formed at the meeting to further coordinate our mutual undertaking Henceforth it shall be known as the International Society of Oxygen Transport to Tissue A final note of acknowledgement should be made to those who were in the supporting cast not only in making the meeting in Charleston and Clemson a success but also in the compiling of this book Gratitude is due to Dr Daniel H Hunt for his efforts the end product of which you have in your hands Considerable service was rendered by Mr Robert J Adams Mr Buddy Bell and Mr Nathan Kaufman during the symposium itself Much typing organizing and record keeping was done by our lovely secretaries Laura B Grove Muff Graham and Kaye Y Zook Oxygen Transport to Tissue XXXI Eiji Takahashi, Duane F. Bruley, 2010-03-10 The International Society on Oxygen Transport to Tissue ISOTT www.isott.info is an interdisciplinary society comprising about 250 members worldwide Its purpose is to further the understanding of all aspects of the processes involved in the transport of oxygen from the air to its ultimate consumption in the cells of the various organs of the body The annual meeting brings together scientists engineers clinicians and mathematicians in a unique international forum for the exchange of information and knowledge the updating of

participants on latest developments and techniques and the discussion of controversial issues within the field of oxygen transport to tissue Founded in 1973 the society has been the leading platform for the presentation of many of the technological and conceptual developments within the field both at the meetings themselves and in the proceedings of the society These have been published first by Plenum Publishing 1973 then by Kluwer Academic Plenum Publishers and presently by Springer Publishing all in the Advances In Experimental Medicine and Biology Series The 36th Annual ISOTT conference was held in Sapporo Japan during August 3-7 2008 It was the second occasion that the ISOTT meeting was held in Japan the first one was held in the same place in 1987 organized by Professor Masaji Mochizuki

Viral Entry into Host Cells Stefan Pöhlmann, Graham Simmons, 2013-07-24 For a virus to invade a host cell it needs to penetrate the physical barrier imposed by the plasma membrane Viruses have evolved specialized surface proteins to meet this challenge These proteins facilitate delivery of the viral genetic information into the host cell by either fusing the viral envelope with a host cell membrane or by forming membrane pores Membrane fusion and pore formation critically depend on the engagement of host cell receptors and receptor choice is a key determinant of viral tropism The multi faceted interplay between viral and cellular factors during virus entry is a fascinating field of study which can provide important insight into viral pathogenesis and define new targets for intervention This book provides a comprehensive overview of this exciting field of research

β-barrel Channel Proteins as Tools in Nanotechnology Marco Fioroni, Tamara Dworeck, Francisco Rodriguez-Ropero, 2013-11-04 barrel outer membrane channel proteins OMP are useful as robust and flexible models or components in nanotechnology Over the last decade biotechnological techniques allowed to expand the natural characteristics of OMPs by modifying their geometry and properties The present book is oriented towards a broad group of readers including graduate students and advanced researchers It gives a general introduction to the field of OMP based nanocomponent development as well as the state of the art of the involved research On the example of the E coli FhuA the transformation of an OMP into a tailored nano channel will be outlined An exhaustive description of the scientific strategy including protein selection analytical methods and in silico tools to support the planning of protein modifications for a targeted application consideration on the production of a custom made OMP and an overview on technological applications including membrane polymersome technology will be provided

Vaupel,Rolf Zander,Duane F. Bruley,2012-12-06 Seventeen years after the 2nd International Symposium on Oxygen Transport to Tissue which was held in Mainz in March 1975 the local Organizing Committee and the Board of ISOTT were pleased to host the ISOTT Conference in Mainz on the Rhine again The venue of the 20th meeting was the prestigious fully restored Schloss Waldthausen Waldthausen Castle which provided a special setting for ISOTT 1992 The beautiful front view of the castle became part of the ISOTT 1992 logo The 20th ISOTT Meeting was held in Mainz from August 26th through August 30th 1992 The Conference attracted 200 active participants from 16 countries The theme of this meeting emphasized oxygen transport to tumors but as in earlier meetings essentially all aspects of oxygen transport within the body were covered as demonstrated by the manuscripts comprising this volume of the series Oxygen Transport to Tissue All manuscripts were reviewed Extensive revisions were made in about 25% and modest revision in about another 30% Because we had to compromise between the aim of rapid publication on the one hand and the need for thorough review on the other minor errors in format and some typographical errors were not corrected Except for some revisions all of the original camera ready manuscripts in this volume were prepared by the authors themselves and we greatly appreciate their cooperation
