 emergency medicine Endorsed by the American College of Emergency Physicians The 8th edition of Tintinalli s Emergency

Medicine provides the depth and breadth of coverage that reflects the complexity and expertise needed to practice emergency medicine successfully in today's fast-paced environments. It is an important contemporary clinical emergency care resource for physicians, NPs, and PAs who practice emergency medicine and for emergency medicine and pediatric emergency medicine fellows. It remains the preferred study guide for in-training and board examinations and recertification. NEW to this edition: Full color design with more tables than ever to succinctly present key information. Extensive updates to all sections incorporating the latest guidelines, evidence-based protocols, and relevant research. Expanded pediatric section with complete clinical information for general and pediatric emergency physicians. Expanded coverage of common emergency department procedures with improved illustrations. Online access to more than 30 videos covering a wide range of procedural and diagnostic topics and focusing on the latest ultrasound-guided techniques. From the reviews of the seventh edition: Collectively they have once again produced an excellent text that manages to cover the broad scope of emergency medicine while remaining an easily readable and practical resource. Last for the inevitable comparison of this current edition of Tintinalli's Emergency Medicine with other available emergency medicine textbooks available in my opinion Tintinalli's still comes out on top. It is more concise and easier to read than some yet it covers the breadth of emergency medicine practice more comprehensively than others. Just as previous editions did the seventh presents all of the most pertinent and up-to-date information in a well-organized format that is comprehensive yet easy to read. That and many of the attractive new features in this current edition will ensure its place on my bookshelf for years to come. JAMA     Aging Harold Cox, 2001-08. This new edition is representative of the field of gerontology in that it is interdisciplinary in its approach. The public press articles in this volume were chosen because they address the most relevant and current problems in the field of aging and present a variety of divergent views on the appropriate solutions to these problems. These well-illustrated articles are written by gerontologists, educators, researchers, and writers and provide an effective and useful perspective on today's important topics in the study of aging.     **Palliative Care Training**, 2007     **Hospice and Palliative Nursing Practice Review** Barbara G.
