What Is Wheel Brim-to-Rim

By Jeff Labadie

It's a term you've probably heard, but what does it mean? Wheel brim-to-rim is a term used to describe the process of painting the wheels of a vehicle. It's a popular service offered by many auto body shops, and it's a great way to protect your wheels from rust and corrosion.

When you have your wheels painted, you're protecting them from the elements. The paint acts as a barrier between the metal and the air, preventing rust from forming. This is especially important in areas where there's a lot of moisture, like near the water or in the winter months. Plus, it gives your wheels a fresh, new look. If you're not sure if you should get your wheels painted, ask your mechanic. They'll be able to tell you if it's worth the investment.

The approach of each title is an appeal to students who think that the subject is boring or too difficult or both. The authors, all experienced educators, take a light approach showing kids what is most interesting about each subject and how seemingly difficult problems can be transformed into fun quizzes, brain ticklers, and challenging puzzles with rational solutions. In this volume, students learn to see patterns in math word problems, then compute with decimals, fractions, compare rates, and solve proportions. Then, using everyday real-world examples, they explore statistics and probabilities and learn how math can actually predict future outcomes and events. Other areas of practical math are examined with a final chapter that searches out problems and activities that can be found on the World Wide Web.
