This book provides a critical overview of the current use of learning technologies for educational innovation and examines global trends in educational innovation. It also shares experiences in educational innovation with learning technologies in Europe and Latin America. Despite increasing concerns about the use of technology in education, this book discusses how these can be addressed by focusing on fundamental principles such as personalization, collaboration, engagement, accessibility, and professional development.

*Proceedings of 4th International Conference on Artificial Intelligence and Smart Energy* S. Manoharan, Alexandru Tugui, Zubair Baig, 2024-06-07

This book presents a comprehensive collection of research chapters focusing on innovative solutions to energy and sustainability challenges. It reflects the collaborative efforts of researchers worldwide, showcasing novel approaches to complex problems. Topics discussed range from securing cyber physical systems to revolutionizing healthcare with AI and robotics, emphasizing sustainable research. The book emphasizes smart and sustainable energy solutions, highlighting advancements in solar panel efficiency, fault analysis, and fuzzy controlled converters for grid tied photovoltaic systems. Additionally, it explores AI's transformative potential in water solutions, agriculture, and renewable energy technologies across domains like smart cities, transportation, and healthcare. The insights shared aim to inspire further research, foster discussions, and drive real world impact toward a resilient, inclusive, and sustainable future.

Discusses issues and offers sustainable solutions to meet the challenges faced by today's economy and industry. Presents recent research in the sustainable transformation of engineering and technological systems. Serves as a valuable resource for both academic researchers and industry practitioners interested in Artificial Intelligence, AI, and smart energy sectors.

[Build a Text-to-Image Generator \(from Scratch\)](#) Mark Liu, 2026-01-13

This book takes you step by step through creating your own AI models that can generate images from text. You'll explore two methods of image generation: vision transformers and diffusion models, and learn vital AI development techniques as you go. Dive into the powerful models behind AI image generators. The best way to learn is to build something from scratch, and in this book, you'll build your very own diffusion model and vision transformer. As you work through each stage of development, you'll develop an understanding of how these models can be customized, applied, and integrated for impressive multimodal AI.

*Build a Text to Image Generator from Scratch* teaches you how to build and train models to generate high resolution images based on text descriptions. Edit an existing image based on text prompts. Build and train a model to add captions to images. Build and train a vision transformer to classify images. Fine tune LLMs for downstream tasks such as classification, text or image generation. Better differentiate real images from deepfakes. About the technology: AI generated images appear everywhere from high end advertising to casual social media feeds. Text to image tools like Dall-e, Midjourney, and Flux make it easy to create AI art, but how do they work? In this book, you'll find out by building your own text to image generator. About the book: *Build a Text to Image Generator from Scratch* explores both transformer based image generation and diffusion models. You'll work hands on to build a pair of simple generation models that can classify images, automatically add captions, reconstruct images, and
