**Strategies for Mitigating Zoonotic Influenza Outbreaks: A Comprehensive Preparedness Approach** Sneha Vishwanath, Hazel Stewart, Sankaran Sandhya, 2025-10-13

Zoonotic influenza particularly avian influenza has become a pressing concern in recent years due to its increasing incidence and potential to cause pandemics The virus's ability to jump directly from birds to humans without an intermediate host has raised alarms as humans generally lack immunity to these strains This situation is exacerbated by the genetic diversity and rapid mutation rate of influenza viruses which complicates efforts to predict and control outbreaks Contributing factors such as global agricultural practices increased human animal interactions spillovers into other mammals and environmental changes further heighten the risk of future influenza pandemics Despite ongoing research significant gaps remain in our understanding of these viruses and how best to prepare for potential pandemics Current studies have made strides in understanding virus transmission dynamics and developing vaccines and therapeutics but a comprehensive approach is still needed to address these challenges effectively
