Multipreneurship Nicholas Harkiolakis,2016-04-15 In Multipreneurship Diversification in Times of Crisis Nick Harkiolakis argues against the more commonly held view that diversification at the level of the individual entrepreneur rather than that of the established corporation is the wrong business strategy to pursue in times of economic crisis He contends that entrepreneurship always proves in almost every circumstance and every part of the world to be a way out of economic straits and it is widely accepted as the primary force that helps produce self sufficiency social inclusion job creation capital formation and skills acquisition Threats to job stability in today s economic climate are expected to trigger latent entrepreneurship that could lead to re investment of social capital to generate financial capital Cash nowadays might not be the main value added commodity In an information society some of the basic ingredients of successful entrepreneurship such as confidence and social capital might be equally important Contrary to received wisdom in relation to SME diversification the ability to run a group of businesses as a profit ecosystem rather than business units might prove to be beneficial in volatile economic times If conditions improve one can always focus on growth of the most profitable and promising units Yet in unstable economic times resorting to back up alternatives away from the mainstream business of organizations might be a solution to sustainable development

Thurman,2017-03-16 A leader's role in the management of change is a critical issue for successful outcomes of strategic initiatives Globalization and economic instability have prompted an increase in organizational changes related to downsizing and restructuring in order to improve financial performance and organizational competitiveness Researchers agree that a leader's inability to fully understand what is needed in order to guide their organization through successful change can be a reason for failure Proper planning and management of change can reduce the likelihood of failure promote change effectiveness and increase employee engagement Yet change in organizations must be viewed as a continuous activity that affects both organizational and individual outcomes If change management can be considered as an event induced by socio cultural factors the cultural variable gains greater significance when applied to the quality of the relationship between a leader and their team Many organizations today are on the verge of internationalization It is here that the cultural context can affect behaviors and in the same way leadership style The research presented in this book by an eminent group of scholars explores the influence of culture ethnic regional religious on how leaders manage change within organizations *Leadership Explained* Nicholas Harkiolakis,2016-11-03 Unfortunately leadership does not have a one size fits all definition We all have our own ideas as to what makes a good leader and the types of challenges that will be faced The author bridges a gap by presenting how modern leadership happens while simultaneously combining a description of leadership and its practical application in today's environments In this book Nicholas Harkiolakis integrates the various theoretical perspectives into a unified model that can be understood by both the academic and the practitioner existing and future leaders This understanding is necessary to effectively treat and apply leadership to the challenging settings of today's operational environments virtual distributed multicultural and so on Some of the key topics covered are leadership through the ages characteristics of leadership modern perspectives an integrated leadership framework the application of leadership the twenty first century leadership practices
