The Material Life Liza Amlani, Raj Dhiman, 2025-12-17 This book discusses the value of how versus what Process innovation is the practice of improving how products are made Many retailers and brands often overemphasize what products are sold In doing so they miss out on valuable cost savings and getting products to market faster This book will demonstrate why investing in the how impacts the bottom line The book also outlines the exact steps brands need to take to improve the how Materials make up every product we sell The term materials accounts for patterns zippers ties trims and more Yet most materials are an afterthought in the product creation process First we design and then consider what materials to use Materials teams do not sit alongside design and are often located overseas to be close to mills and factories Further materials teams often report to sourcing As such they are isolated from design merchandising and planning teams Although this model has been working for years it allows for inefficiencies to creep in There is another layer of complexity to consider The concept to market a k a go to market calendar outlines the time needed to design assort produce and ship products to a distribution center or store The calendar marks crucial decision making moments It is common for brands to have overlapping calendars That means teams are working on more than one season at a time As a result it is very common to find materials teams scrambling to meet short term deadlines Many of these deadlines are pushed out leading to products being late to market This costs a retailer or brand valuable profits and gross margin Further long term innovation goals are also sacrificed Outdated mindsets related to the use of technology also hinder progress Decisions on materials and product assortment cannot be made without a physical sample This happens even at the highest levels of the world s largest brands The reliance on physical samples is called Touch Crutch or No Sample No Sale Contrast this with advances in technology allowing us to do remote surgery and control spacecraft on earth As such retail executives should use digital tools to approve materials and products Further there are useful tools available to bank materials into a digital library saving valuable hours of work Retailers and brands are constantly seeking out ways to be faster to market Process innovation is where the gains are made Many areas within product creation are ripe for improvement Materials and all things related to them are a rich area of opportunity that is rarely explored This book provides information insights and real life examples to help brands improve processes and get them faster to market In doing so there will be a direct and positive impact to the bottom line
