## Oxygen Billion History Science Essentials:

**Oxygen** Donald E. Canfield, 2014-01-19 The remarkable scientific story of how Earth became an oxygenated planet. The air we breathe is twenty one percent oxygen an amount higher than on any other known world. While we may take our air for granted Earth was not always an oxygenated planet. How did it become this way? Donald Canfield one of the world's leading authorities on geochemistry, earth history and the early oceans covers this vast history emphasizing its relationship to the evolution of life and the evolving chemistry of the Earth. Canfield guides readers through the various lines of scientific evidence, considers some of the wrong turns and dead ends along the way and highlights the scientists and researchers who have made key discoveries in the field. Showing how Earth's atmosphere developed over time, Oxygen takes readers on a remarkable journey through the history of the oxygenation of our planet.

**Found in Translation - Genesis One** J. Roland Kent, 2016-02-23 J R Kent has solved a 2 500 year old mystery that defies both religion and science. Hidden in the thirty one verses of Genesis One is a message so powerful it could ultimately change the course of global events. Our hi tech world is barely a century old and already life altering environmental terrorist political economic and health threats pose potentially dire consequences for our future. However many of the ancient advanced civilizations such as the Egyptians, the Greeks, the Romans and the Mayans of Central America endured for thousands of years. So what was their secret and how is it revealed in the Genesis verses? Genesis One is an ancient creation account for the earth plants animals and humankind. However when reading these verses they may seem bewildering and out of the natural order. The premise of this book illustrates in startling detail that this amazing story in fact perfectly correlates with the theories of modern science. There are several reasons why this mystery has not been revealed until now. First an ancient author wrote this account in the original Hebrew language but the actual evolutionary sequence of the Earth that he so accurately revealed has been lost in translation by the many biblical versions that followed. Second the discoveries of modern science now put us at a point in time when this correlation has now been found in translation. This revelation then begs two questions: How was this knowledge possible in ancient times and who wrote it?

*Colliding Worlds* Simone Marchi, 2021 Drawing on the latest research, Simone Marchi describes the vital role that collisions in space have played in the formation and evolution of the solar system and inner planets. Comparing the evidence from the surfaces of our planetary neighbours, he explains the impact of these strikes on the Earth and our Moon and on the evolution of life.
