# Padi Refresher Manual

**PADI**

A graphic element consisting of a light blue horizontal bar with a rounded right end, followed by a red circular shape with a white center, resembling a PADI logo.

## **Padi Refresher Manual:**

**PADI Rescue Diver Manual**, 1984      **Dennis Graver's 100 Best Scuba Quizzes** Dennis Graver, 1997 Hollywood detective Toby Peters does a job for one of Tinseltown's finest. It's been four years since security guard Toby Peters got fired from the Warner Brothers lot for breaking a screen cowboy's arm. Since then he's scratched out a living as a private detective missing persons and bodyguard work mostly but now his old friends the Warners have a job for him. Someone has mailed the studio a picture of Errol Flynn caught in a compromising position with a very young girl. Although Flynn insists it's a fake, the studio is taking no chances. Toby is to deliver the blackmailer \$5,000 and return with the photo negative. It should be simple but Flynn a swashbuckler on and off the screen has a way of making things complicated. Though he isn't impressed by movie stars if Toby Peters isn't careful he may end up dying for one.

**Geothermal Heat Flux at the COST B-2 and B-3 Wells, U. S. Atlantic Continental Margin** B. Della Vedova, 1987 Heat flow estimates at two sites on the U.S. Atlantic continental margin are presented. An estimate of the heat flowing from the basement also has been obtained. About 4.8 km of sediments penetrated at the COST B-2 and 4.0 km at the COST B-3 were deposited since the Upper Jurassic. Well logs were used to evaluate thermal gradients and sedimentation rates whereas thermal conductivities and radiogenic heat productions were measured on drill cuttings samples. A procedure to estimate in situ thermal conductivity from drill cuttings and well logs is described. A substantial set of samples in the form of drill cuttings were sorted in four major lithologies: sandstones, siltstones, shales, and limestones. Laboratory measurements of density, porosity, thermal conductivity, quartz %, potassium %, uranium ppm, and thorium ppm were performed on 128 reorganized and pulverized samples. A significant correlation of the matrix thermal conductivity to quartz and potassium content was found. In situ porosity and volume fraction of each lithology determined mainly from well logs were used to calculate in situ mean thermal conductivity. Finally, the mean in situ vertical component of the thermal conductivity as required for heat flow values has been estimated from a correction factor for the anisotropy of each lithology. The in situ temperature and anisotropy effects substantially decrease estimates of thermal conductivity at depth. Below the uppermost 1 km in both wells, the best estimate of the thermal gradient is 26.3 °C/km at COST B-2 and 26.1 °C/km at COST B-3, whereas in situ mean thermal conductivities range between about 1.8 and 1.9 W/m·K. The average heat flow is estimated as about 45 mW/m<sup>2</sup> at COST B-2 and 44 mW/m<sup>2</sup> at COST B-3 with an uncertainty of about 20–25%. The mean radiogenic production in sediments at the two sites has been estimated as 1.83 μW/m<sup>3</sup> at COST B-2 and 1.44 μW/m<sup>3</sup> at COST B-3. With a 12–14 km thick sedimentary sequence, a radioactive contribution of 20–25 mW/m<sup>2</sup> can be expected. The effects of sediment deposition, compaction, pore water advection, and radiogenic heat production have been combined in a numerical model (Hutchison, 1985) to estimate the undisturbed basement heat flux. Although the sedimentation depresses the basement heat flux by 15–20%, this effect is more than compensated by radioactive heat production in the sediments so that the surface flux is estimated to be higher than that from the basement.

The latter is calculated at about 33 39 mwm 2 0 8 0 9 H F U a relatively low value The overall uncertainty is about 20 25% and other estimates on continental margins with thick sediments e g Reiter and Jessop 1985 probably have at least a similar uncertainty Bibliography on Diving and Diving Safety for a Scientific Diving Program Margaret A. Rioux,1987 Diving scientific diving and diver safety are specialized subject areas not generally well represented in even the largest of academic libraries largely because of difficulties in locating appropriate items to include in the collection However in order to adequately fulfill his her responsibilities the Diving Safety Officer of a scientific diving program needs easy access to a broad range of books reports and journals covering all aspects of diving This bibliography outlines a comprehensive collection appropriate to the needs of a scientific diving program in a research or academic institution Items are grouped in broad subject areas corresponding to various aspects of the diving program Both title and author indexes are also included
