Pedriali, Cristina Savettieri, 2020-08-19 This book tackles cultural mobilization in the First World War as a plural process of identity formation and de formation It explores eight different settings in which individuals communities and conceptual paradigms were mobilized Taking an interdisciplinary approach it interrogates one of the most challenging facets of the history of the Great War one that keeps raising key questions on the way cultures respond to times of crisis Mobilization during the First World War was a major process of material and imaginative engagement unfolding on a military economic political and cultural level and existing identities were dramatically challenged and questioned by the whirl of discourses and representations involved

Domesticated Richard C Francis, 2016-08-02 Without domestication civilization as we know it would not exist Since that fateful day when the first wolf decided to stay close to human hunters humans and their various animal companions have thrived far beyond nearly all wild species on earth Tamelessness is the key trait in the domestication of cats dogs horses cows and other mammals from rats to reindeer Surprisingly with selection for tameness comes a suite of seemingly unrelated alterations including floppy ears skeletal and coloration changes and sex differences It s a package deal known as the domestication syndrome elements of which are also found in humans Our highly social nature one of the keys to our evolutionary success is due to our own tameness In *Domesticated* Richard C Francis weaves history and anthropology with cutting edge ideas in genomics and evo devo to tell the story of how we domesticated the world and ourselves in the process

*Thomas Pynchon's Animal Tales* Keita Hatooka, 2022-08-29 Throughout his works Thomas Pynchon uses various animal characters to narrate fables that are vital to postmodernism and ecocriticism Thomas Pynchon s *Animal Tales Fables for Ecocriticism* examines case studies of animal representation in Pynchon s texts such as alligators in the sewer in *V* the alligator purse in *Bleeding Edge* dolphins in the Miami Seaquarium in *The Crying of Lot 49* dodoes pigs and octopuses in *Gravity s Rainbow* Bigfoot and Godzilla in *Vineland* and *Inherent Vice* and preternatural dogs and mythical worms in *Mason Dixon* and *Against the Day* Through this

exploration Keita Hatooka illuminates how radically and imaginatively the legendary novelist depicts his empathy for nonhuman beings Furthermore by conducting a comparative study of Pynchon s narratives and his contemporary documentarians and thinkers Thomas Pynchon s *Animal Tales* leads readers to draw great lessons from the fables which stimulate our ecocritical thought for tomorrow *Unnatural Selection* Katrina van Grouw,2018-07-31 A lavishly illustrated look at how evolution plays out in selective breeding *Unnatural Selection* is a stunningly illustrated book about selective breeding the ongoing transformation of animals at the hand of man More important it s a book about selective breeding on a far far grander scale a scale that encompasses all life on Earth We d call it evolution A unique fusion of art science and history this book celebrates the 150th anniversary of Charles Darwin s monumental work *The Variation of Animals and Plants under Domestication* and is intended as a tribute to what Darwin might have achieved had he possessed that elusive missing piece to the evolutionary puzzle the knowledge of how individual traits are passed from one generation to the next With the benefit of a century and a half of hindsight Katrina van Grouw explains evolution by building on the analogy that Darwin himself used comparing the selective breeding process with natural selection in the wild and like Darwin featuring a multitude of fascinating examples This is more than just a book about pets and livestock however The revelation of *Unnatural Selection* is that identical traits can occur in all animals wild and domesticated and both are governed by the same evolutionary principles As van Grouw shows animals are plastic things constantly changing In wild animals the changes are usually too slow to see species appear to stay the same When it comes to domesticated animals however change happens fast making them the perfect model of evolution in action Suitable for the lay reader and student as well as the more seasoned biologist and featuring more than four hundred breathtaking illustrations of living animals skeletons and historical specimens *Unnatural Selection* will be enjoyed by anyone with an interest in natural history and the history of evolutionary thinking
