Napoleons Buttons How 17 Molecules Changed History:

Napoleon's Buttons Penny Le Couteur, Jay Burreson, 2004-05-24 Napoleon's Buttons is the fascinating account of seventeen groups of molecules that have greatly influenced the course of history. These molecules provided the impetus for early exploration and made possible the voyages of discovery that ensued. The molecules resulted in grand feats of engineering and spurred advances in medicine and law; they determined what we now eat, drink, and wear. A change as small as the position of an atom can lead to enormous alterations in the properties of a substance, which in turn can result in great historical shifts. With lively prose and an eye for colorful and unusual details, Le Couteur and Burreson offer a novel way to understand the shaping of civilization and the workings of our contemporary world. [Napoleon's Buttons](#) Penny Le Couteur, 2003 Describes seventeen chemical compounds in spices, textile fibers, dyes, explosives, medicines, and other substances, including the drugs that account for witches flying on broomsticks and how they affect civilization.

Napoleon's Buttons, 2003 **Every Molecule Matters** Simon Cotton, 2025-09-10 Every Molecule Matters is a successor to the author's earlier Every Molecule Tells a Story and tells the story of a wide range of molecules. These range from the familiar odours that enhance the pleasure of eating and the spices that add piquancy to the vitamins vital to our survival, as well as the ways in which insects and plants use chemicals to protect themselves. There's controversy surrounding the compounds of chlorine which encompass life-supporting anaesthetics and natural antibiotics, as well as insecticides like DDT which saved innumerable lives but became an environmental cause célèbre. Through the addictive power of nicotine, smoking tobacco transformed from a curiosity imported from the Americas into a megapound industry that has caused significant human illness and death. And how safe is vaping? Discover the painkillers that have become drugs of abuse and smile at the smelly sulfur compounds that serve as unpleasant human odorants and defence molecules for skunks. Control natural cycles in the environment or act as flavourings in wine. You will discover them all here. This book showcases the structures of hundreds of compounds used by humans, animals, and plants. Some are beneficial, some are not. Find out here why you should be better informed about them. This collection of molecules includes human issues such as the chemistry of vaping and drugs of abuse, including spice nitazenes and fentanyl. Chemistry of Everyday includes vitamins and the molecules that give foods their aromas and appetizing appeal. The chemistry of nature: how plants and insects use chemicals to defend themselves against potential predators, whether humans, birds, animals, or other insects. Organohalogen compounds encompassing the atmosphere-damaging CFCs and their replacements and the chlorine compounds that are important medicines, e.g. vancomycin. Using isotopes from archaeologists faced by mysteries of ancient Rome and silver from Spanish conquistadors to tracking down the origin of South American cocaine and solving the Scissor Sister murder case.

Integrating Literature in the Content Areas Sharon Kane, 2017-05-12 This practical, accessible resource will help future and practicing teachers integrate literature into their middle school or high school classrooms while also addressing content

area standards and improving the literacy skills of their students Two introductory chapters are followed by five chapters that each cover a different genre Chapter 3 Informational Books Chapter 4 Fiction Chapter 5 Biography Autobiography and Memoir Chapter 6 Poetry and Chapter 7 How to and Hands on Books Each genre chapter consists of four parts Part 1 Discusses the genre and how content area teachers can use books within that genre to further content learning and enhance literacy skills Part 2 Offers hands on instructional strategies and activities using literature with activities for use in a variety of disciplines Part 3 Presents individual author studies three or four per chapter with bibliographies and guidelines for using the authors books in content area courses Part 4 Features an annotated bibliography of specially selected children and young adult literature for that genre organized by content area The annotations provide information about the book which can be used to prepare booktalks and teaching ideas for using in a specific content area Altogether these sections contain more than 600 annotated entries tabbed by subject area including art English language arts languages and culture math and technology music PE health science and social studies history
