*Technology and Adolescent Mental Health* Megan A. Moreno, Ana Radovic, 2018-03-01 This comprehensive book provides a framework for healthcare providers working with the dual challenges and opportunities presented by the intersection of mental health and technology. Technology and Adolescent Mental Health provides recent evidence based approaches that are applicable to clinical practice and adolescent care with each chapter including a patient case illustrating key components of the chapter contents. Early chapters address the epidemiology of mental health while the second section of the book deals with how both offline and online worlds affect mental health presenting both positive and negative outcomes and focusing on special populations of at risk adolescents. The third section of the book focuses on technology uses for observation, diagnosis or screening for mental health conditions. The final section highlights promising future approaches to technology and tools for improving intervention and treatment for mental health concerns and illnesses. This book will be a key resource for pediatricians, family physicians, internal medicine providers, adolescent medicine and psychiatry specialists, psychologists, social workers as well as any other healthcare providers working with adolescents and mental health care.

**History of Anxiety...Yours and Mine** Patricia Pearson, 2008-03-04 Drawing on personal episodes that are by turns gripping and laugh out loud funny, Pearson delves into the history and geography of anxiety in a quest to understand this most ancient of human emotions. Why do we feel fear even when it has no cause? What triggers phobias? Why are Americans so much more likely to have clinically significant levels of anxiety than their Mexican neighbors? Why did Darwin treat his hypochondria with sprays from a hose? Why have we forsaken the insights of some of our greatest philosophers, theologians and psychologists in favor of prescribing addictive drugs? Finally, Pearson documents her struggle to withdraw from antidepressants and to find more self-aware and philosophically grounded ways to strengthen the soul.

Carter, 2026-01-06 Practice a new framework for dismantling racial bias in our society, our workplaces and ourselves by learning to detect it as well as people of color do. How do we combat racism in a world determined to tell us it doesn't exist? To hold the line against racism we need to know it when we see it. And as the dominant racial group in our

society White people must take up the charge The problem says researcher DEI leader and organizational consultant Dr Evelyn Carter is that White people haven t been socialized to detect racial bias in the way people of color do Racism is more than using racial slurs or overt hateful speech and it s more than unintentional slights it s about an entire system that upholds Whiteness as the preferred standard Fortunately detecting it is a skill that can be learned Was That Racist is a re education call to action and practical guide full of research backed strategies including how to cultivate a growth mindset about bias unlearn colorblindness and practice color consciousness talk to kids about race and racism and bring others along for the journey At a time when DEI is under coordinated attack Was That Racist is the essential toolkit for anyone who believes we all have a role to play in creating a more equitable world Every Saturday ,1872 Social Welfare ,2015-04
