Measurement, Design, and Analysis Elazar J. Pedhazur, Liora Pedhazur Schmelkin, 2013-04-15 In textbooks and courses in statistics substantive and measurement issues are rarely if at all considered Similarly textbooks and courses in measurement virtually ignore design and analytic questions and research design textbooks and courses pay little attention to analytic and measurement issues This fragmentary approach fosters a lack of appreciation of the interrelations and interdependencies among the various aspects of the research endeavor Pedhazur and Schmelkin's goal is to help readers become proficient in these aspects of research and their interrelationships and to use that information in a more integrated manner The authors offer extensive commentaries on inputs and outputs of computer programs in the context of the topics presented Both the organization of the book and the style of presentation allow for much flexibility in choice sequence and degree of sophistication with which topics are dealt

U.S. Government Research Reports, 1962 *Software Metrics and Software Metrology* Alain Abran, 2010-11-19 Most of the software measures currently proposed to the industry bring few real benefits to either software managers or developers This book looks at the classical metrology concepts from science and engineering using them as criteria to propose an approach to analyze the design of current software measures and then design new software measures illustrated with the design of a software measure that has been adopted as an ISO measurement standard The book includes several case studies analyzing strengths and weaknesses of some of the software measures most often quoted It is meant for software quality specialists and process improvement analysts and managers **Statistical Evaluation of Measurement Errors** Graham Dunn, 2009-01-20 The statistical methods used to evaluate and compare different methods of measurement are a vital common component of all methods of scientific research This book provides a practically orientated guide to the statistical models used in the evaluation of measurement errors with a wide variety of illustrative examples taken from across the sciences After introducing basic concepts such as precision reproducibility and reliability a detailed discussion of the sources of variability of measurements and associated variance components models is provided The central chapters deal with the design and analysis of method comparison studies concentrating primarily on quantitative measurements ranging from simple paired comparisons to more complex studies involving three or more methods This leads on to a review of methods for categorical measures *Empirical Direction in Design and Analysis* Norman H. Anderson, 2001-07-01 The goal of Norman H Anderson s new book is to help students develop skills of scientific inference To accomplish this he organized the book around the Experimental Pyramid six levels that represent a hierarchy of considerations in empirical investigation conceptual framework phenomena behavior measurement design and statistical inference To facilitate conceptual and empirical understanding Anderson de emphasizes computational formulas and null hypothesis testing Other features include emphasis on visual inspection as a basic skill in experimental analysis to help students develop an intuitive appreciation of data patterns exercises that emphasize development of conceptual and empirical application of methods of design and analysis and de emphasize formulas and calculations and heavier emphasis on confidence intervals than significance tests The book is intended for use in graduate level experimental design research methods or statistics courses in psychology education and other applied social sciences as well as a professional resource for active researchers The first 12 chapters present the core concepts graduate students must understand The next nine chapters serve as a reference handbook by focusing on specialized topics with a minimum of technicalities **Technical Abstract Bulletin** Defense Documentation Center (U.S.), 1963 *Value* M.
