Managing for Innovation Theodore S. Glickman,Susan C. White,2007-06-29

Innovation can offer flexibility that enables institutions to adapt more readily in a constantly changing environment. It is a means by which colleges and universities can address concerns typically associated with mature enterprises: create tools to ease increasing cost pressures and gain efficiency through better operations and better matching of resources and requirements. How best to foster innovations through supportive management is a central topic of this volume. This is the 137th volume of the quarterly report series *New Directions for Higher Education* *The Role of the Classroom in College Student Persistence* John M. Braxton, 2008-10-13. This issue of *New Directions for Teaching and Learning* brings into sharp focus the complex role college and university faculty play in shaping the persistence and departure decisions of undergraduate students. The authors review practices ranging from curricular structures and instructional staffing policies to faculty teaching methods and they offer recommendations for many common problems. Taken together the chapters outline the elements of a scholarship of practice centered on keeping students in school. College and university presidents, chief academic affairs officers, academic deans, directors and staff members of campus based centers for teaching and individuals responsible for enrollment management will find a great deal of practical wisdom in this volume. *Journal of College Student Development*, 2000 *Powerful Programming for Student Learning: Approaches That Make a Difference* Debora L. Liddell, Jon P. Lund, 2000-07-04. Over the past four decades programming has continued to be a viable strategy for transmitting knowledge, affecting skills development, changing attitudes and helping students reach their potential both on and off campus. This volume will assist student affairs professionals as they plan, implement and evaluate their educational interventions on college and university campuses. From planning a lunchtime seminar to conducting a semester long support group this sourcebook will provide readers with guidance on implementing programming that is powerful, relevant and focused on learning. The contributors detail each step of program assessment, planning, implementation and outcome evaluation. They explain the importance of collaborating with faculty and others illustrating several types of programming partnerships with four brief case studies and examine the significant partnership aspects that led to programming success. The contributors also explore two of today's most relevant programming topics: multicultural competence and sexual violence and provide an overview of a number of promising programs covering such areas as service learning, leadership, community building, alcohol awareness and diversity. This is the 90th issue of the quarterly journal *New Directions for Student Services*.
