## **Measuring Health A Guide To Rating Scales And Questionnaires:**

**Measuring Health: A Guide to Rating Scales and Questionnaires** Ian McDowell, 2006-02-24 Worldwide economic constraints on health care systems have highlighted the importance of evidence based medicine and evidence based health policy. The resulting clinical trials and health services research studies require instruments to monitor the outcomes of care and the output of the health system. However the over abundance of competing measurement scales can make choosing a measure difficult at best. Measuring Health provides in depth reviews of over 100 of the leading health measurement tools and serves as a guide for choosing among them. Now in its third edition this book provides a critical overview of the field of health measurement with a technical introduction and discussion of the history and future directions for the field. This latest edition updates the information on each of the measures previously reviewed and includes a complete new chapter on anxiety measurement to accompany the one on depression. It has also added new instruments to those previously reviewed in each of the chapters in the book. Chapters cover measurements of physical disability, social health, psychological well being, anxiety, depression, mental status testing, pain, general health status and quality of life. Each chapter presents a tabular comparison of the quality of the instruments reviewed followed by a detailed description of each method covering its purpose and conceptual basis, its reliability and validity and where possible shows a copy of the actual scale. To ensure accuracy of the information each review has been approved by the original author of each instrument or by an acknowledged expert.

**Measuring Health** Ian McDowell, Claire Newell, 1987 Measuring Health provides in depth reviews of over 100 of the leading health measurement tools and serves as a guide for choosing among them.
