Mechanical Circulatory Support for Advanced Heart Failure Jeffrey A. Morgan, Andrew B. Civitello, O.H. Frazier, 2017-12-06 This book provides the most up to date information on every aspect of clinical care relating to patients

with advanced heart failure who require mechanical circulatory support as a treatment strategy The book begins with an extensive description of the preoperative patient selection process as well as preoperative medical optimization including bridge to bridge strategies with short term devices The book then transitions into a description of a variety of surgical implantation techniques with special considerations for reoperative surgery A chapter on intraoperative anesthesia management is specifically focused on intraoperative issues relating to MCS patients Subsequent chapters focus on perioperative management as well as long term management of patients on MCS including optimization of a patient's LVAD speed A dedicated chapter on the diagnosis of device thrombosis as well as surgical techniques and outcomes associated with device exchanges is also included The book also summarizes the national and international outcomes data for using MCS as a bridge to transplant and destination therapy There is also a chapter on the utility of stem cells as an adjunct technique for inducing myocardial recovery Finally the book has chapters on complications of MCS management of right ventricular failure and the future of MCS

Mechanical Circulatory Support in End-Stage Heart Failure Andrea Montalto, Antonio Loforte, Francesco Musumeci, Thomas Krabatsch, Mark S. Slaughter, 2017-07-14 This book is a detailed practical guide to the use of ventricular assist devices and total artificial hearts to provide mechanical circulatory support MCS in patients with end stage heart failure It explains why MCS may be indicated which patients require MCS when and how to implant ventricular assist devices or a total artificial heart and how to avoid potential complications of MCS Management throughout the period of care is described from preimplantation to follow up and both typical and atypical cases are discussed The text features numerous helpful tips and tricks relating to surgical and nonsurgical management and is supported by a wealth of high quality illustrations that document the preoperative evaluation and implantation techniques Heart transplantation remains the gold standard for the treatment of patients suffering from end stage heart failure but the shortage of donors has led to an increase in the use of MCS This book will assist all physicians and especially cardiologists and anesthesiologists who are involved in the care of these patients

Mechanical Support for Heart Failure Jamshid H. Karimov, Kiyotaka Fukamachi, Randall C. Starling, 2020-09-04 This book provides a comprehensive overview of mechanical circulatory support of the failing heart in adults and children The book uniquely combines engineering knowledge and the clinician's perspective into a single resource while also providing insights into current and future development of mechanical circulatory support technology such as ventricular assist devices the total artificial heart and catheter based technologies for heart failure Topics featured in this book include The history of mechanical circulatory device development Fundamentals of hemodynamics support Clinical management of mechanical circulatory devices Surgical implantation techniques Current limitations of device therapies in advanced heart failure Advanced and novel devices in the development pipeline Opportunities for advancement in the field Mechanical Support for Heart Failure Current Solutions and New Technologies is a must have resource for not only physicians residents fellows and medical students in cardiology and cardiac surgery but also clinical

and basic researchers in biomedical engineering with an interest in mechanical circulatory support heart failure and new technological applications in medicine
