Claim:

There are different aquatic systems with diverse organisms.

Evidence	Reasoning/Justification
Aquatic ecosystems have abiotic - temp, light, salinity, depth	Different organisms can tolerate different factors
Some organisms prefer fresh water vs. saltwater. Bull sharks + manatees tolerate both	Bull sharks and manatees are very different, but tolerate same conditions
Depth reduces light and increases pressure. Organisms deal with this differently.	Many types of adaptations exist to survive in these conditions
The geography of an aquatic environment can determine the life forms present.	Continental shelf gets lots of light, so there's many living things. Not so in the abyss.
Photosynthesis takes place in the neritic zone.	It is the most productive area of the ocean. Plankton are base of food chain.
Metabolism is affected by temp. Many species are cold-blooded.	Organisms can migrate or must have adaptations to survive.

Embracing the Song of Term: An Mental Symphony within **Note Taking Guide Episode 202 Answers In Genesis**

In a world taken by monitors and the ceaseless chatter of immediate transmission, the melodic elegance and psychological symphony created by the published word often disappear in to the backdrop, eclipsed by the persistent noise and disruptions that permeate our lives. But, situated within the pages of **Note Taking Guide Episode 202 Answers In Genesis** a stunning fictional value full of fresh thoughts, lies an immersive symphony waiting to be embraced. Constructed by an elegant composer of language, this fascinating masterpiece conducts readers on an emotional journey, well unraveling the concealed tunes and profound affect resonating within each cautiously constructed phrase. Within the depths of this touching examination, we can discover the book is main harmonies, analyze its enthralling writing design, and submit ourselves to the profound resonance that echoes in the depths of readers souls.
