TEXT BOOK OF ARTIFICIAL INTELLIGENCE Dr. Rakesh Singh, Dr. Shuchi Dave, Prof. Sushil K. Kashaw, Prof. (Dr.) Sandeep Gangrade, Lalbihari Barik, 2025-04-25 Textbook of Artificial Intelligence is a comprehensive guide for students educators and professionals seeking foundational and advanced knowledge in AI. It begins with a clear definition and history of Artificial Intelligence helping readers understand its roots and evolution. The book explores real world applications of AI across various industries including healthcare finance education and autonomous systems. Core AI branches like Machine Learning Deep Learning NLP Robotics and Computer Vision are introduced with practical insights. In depth coverage of Intelligent Agents explains their structure types and operating environments. The Problem Solving section walks readers through classic algorithms like BFS DFS A* and adversarial search techniques. Knowledge Representation and Reasoning introduces propositional logic predicate logic semantic nets and uncertainty models like Bayesian networks. Machine Learning fundamentals cover supervised unsupervised and reinforcement learning alongside key algorithms and neural networks. Advanced topics like CNNs RNNs Transformers GANs and NLP tasks are well structured for deeper understanding. Dedicated chapters on AI in real world applications showcase use cases in robotics vision and recommender systems. Hands on tools like TensorFlow PyTorch Keras and data handling with Pandas and NumPy are introduced for practical learning. The book encourages ethical thinking with discussions on AI fairness privacy transparency and regulation. A special focus on the future of AI covers trends like generative models autonomous agents and human AI collaboration. Well organized content helps learners connect theory to practical implementation and innovation. Step by step examples and algorithm breakdowns make complex topics easy to understand. Each chapter includes conceptual summaries illustrations and review questions for better retention. Perfect for beginners and intermediate learners as well as educators designing AI curricula. Prepares students for research and industry careers with real world insights and project ideas. Bridges the gap between traditional AI principles and modern AI technologies. A valuable reference for anyone passionate about building intelligent systems and exploring the world of AI.

Artificial intelligence and education Wayne Holmes, Jen Persson, Irene-Angelica Chounta, Barbara Wasson, Vania Dimitrova, 2022-11-30 Ensuring that AI empowers educators and learners not over empowers them and that future developments and practices are truly for the common good. Artificial intelligence AI is increasingly having an impact on education bringing opportunities as well as numerous challenges. These observations were noted by the Council of Europe's Committee of Ministers in 2019 and led to the commissioning of this report which sets out to examine the connections between AI and education. AI and it provides a critical analysis of the academic evidence and the myths and hype. The Covid 19 pandemic school shutdowns triggered a rushed adoption of educational technology which increasingly includes AI assisted classrooms tools AIED. This AIED which by definition is designed to influence child development also impacts on critical issues such as privacy agency and human dignity all of which are yet to be fully explored and addressed. But AI ED is

not only about teaching and learning with AI but also teaching and learning about AI AI literacy addressing both the technological dimension and the often forgotten human dimension of AI The report concludes with a provisional needs analysis the aim being to stimulate further critical debate by the Council of Europe's member states and other stakeholders and to ensure that education systems respond both proactively and effectively to the numerous opportunities and challenges introduced by AI ED

Media Industries in the Digital Age Amanda D. Lotz, Timothy Havens, 2024-11-18 The digital communication technologies that emerged at the turn of the century have profoundly disrupted long practiced norms of nearly every media industry In particular internet distribution has fundamentally changed the foundation of the media industry to enable the emergence of new sectors while posing a challenge for others *Media Industries in the Digital Age* reframes our understanding of media businesses in the light of these substantial changes To develop an integrated understanding of media industries today the book foregrounds the different funding sources that are now common It begins by mapping the foundations and developments of media industry operation and exploring all forms of advertiser funded and consumer funded media to identify connections across sectors including digital and legacy media The final section grounds the book's conceptual work in examples of media making to explore how some old media have successfully adapted to internet disruption and the differences and similarities of media making outside of corporations Looking to the future the book anticipates implications for the emerging metaverse media experiences and the key issues generative AI poses to the sector Ultimately the book argues that the contemporary differences in media industry operation vary by sector but meaningful patterns can be identified by considering how advertiser consumer or government funding sets different priorities Offering a new and original way of understanding the media industries today this book is enlightening reading for students and scholars of media studies and media industries as well as global industry professionals
