Running a Creative Company in the Digital Age Lucy Baxter, 2017-02-23 A practical guide to building and managing a thriving creative business in the digital age. In today's media landscape digital content production is more accessible than ever. This guide provides the essential knowledge and tools to navigate the challenges and opportunities of running a creative company. Learn how to set up your business structure, your team, manage finances and produce compelling content for diverse platforms including TV, film and digital media. *Running a Creative Company in the Digital Age* offers expert advice on funding, marketing and networking with case studies and interviews from industry leaders. Discover innovative business models, strategies for handling tricky situations and tips for building a strong brand. Whether you're a filmmaker, designer or digital content creator, this book will empower you to turn your creative vision into a successful and sustainable business.

Target audience: Aspiring and current creative entrepreneurs, media professionals and students in creative fields. *The New Enlightenment and the Fight to Free Knowledge* Peter B. Kaufman, 2021-02-23 How do we create a universe of truthful and verifiable information available to everyone? In *The New Enlightenment and the Fight to Free Knowledge*, MIT Open Learning's Peter B. Kaufman describes the powerful forces that have purposely crippled our efforts to share knowledge widely and freely. Popes and their inquisitors, emperors and their hangmen, commissars and their secret police throughout history, all have sought to stanch the free flow of information. Kaufman writes of times when the Bible could not be translated, you'd be burned for trying, when dictionaries and encyclopedias were forbidden, when literature and science and history books were trashed and pulped, sometimes along with their authors, and when efforts to develop public television and radio networks were quashed by private industry. In the 21st century, the enemies of free thought have taken on new and different guises: giant corporate behemoths, sprawling national security agencies, gutted regulatory commissions. Bereft of any real moral compass or sense of social responsibility, their work to surveil and control us are no less nefarious than their 16th and 18th and 20th century predecessors. They are all part of what Kaufman calls the Monsterverse. *The New Enlightenment and the Fight to Free Knowledge* maps out the opportunities to mobilize for the fight ahead of us. With the Internet and other means of media production and distribution video especially at hand, knowledge institutions like universities, libraries, museums and archives have a special responsibility now to counter misinformation, disinformation and fake news and especially efforts to control the free flow of information. A film and video producer and former book publisher, Kaufman begins to draft a new social contract for our networked video age. He draws his inspiration from those who fought tooth and nail against earlier incarnations of the Monsterverse, including William Tyndale in the 16th century, Denis Diderot in the 18th, untold numbers of Soviet and Central and East European dissidents in the 20th, many of whom paid the ultimate price. Their successors: Advocates of free knowledge like Aaron Swartz of free software like Richard Stallman, of an enlightened public television and radio network like James Killian, of a freer Internet like Tim Berners Lee, of fuller rights and freedoms like Edward Snowden.

All have been striving to secure for us a better world marked by the right balance between state society and private gain The concluding section of the book its largest piece builds on their work drawing up a progressive agenda for how today s free thinkers can band together now to fight and win With everything shut and everyone going online The New Enlightenment and the Fight to Free Knowledge is a rousing call to action that expands the definition of what it means to be a citizen in the 21st century

Netflixed Gina Keating,2012-10-11 Netflix has come a long way since 1997 when two Silicon Valley entrepreneurs Marc Ran dolph and Reed Hastings decided to start an online DVD store before most people owned a DVD player They were surprised and elated when launch day traffic in April 1998 crashed their server and resulted in 150 sales Today Netflix has more than 25 million subscribers and annual revenues above 3 billion Yet long term success or even survival is still far from guaranteed Journalist Gina Keating recounts the absorbing fast paced drama of the company s turbulent rise to the top and its attempt to invent two new kinds of business First it engaged in a grueling war against video store behemoth Blockbuster transforming movie rental forever Then it jumped into an even bigger battle for online video streaming against Google Hulu Amazon and the big cable companies Netflix ushered in such innovations as DVD rental by mail a patented online queue of upcom ing rentals and a recommendation algorithm called Cinematch that proved crucial in its struggle against bigger rivals Yet for all its success Netflix is still a polariz ing company Hastings is often heralded as a visionary he was named Business Person of the Year in 2010 by Fortune even as he has been called the nation s worst CEO Netflix also faces disgruntled customers after price increases and other stumbles that could tarnish the brand forever The quest to become the world s portal for pre mium video on demand will determine nothing less than the future of entertainment and the Internet Drawing on extensive new interviews and her years covering Netflix as a financial and entertainment reporter Keating makes this tale as absorbing as it is important
