Over Martinus Nijhoff:

Over Martinus Nijhoff Jan Engelman, 1953 *Over Martinus Nijhoff. [Articles by Jan Engelman and A. Roland Holst, with the Text of a Lecture by M. Nijhoff "Over Eigen Werk."].* Martinus NIJHOFF (the Younger.), 1953 *Husserl and Heidegger on Being in the World* Søren Overgaard, 2004-04-30 It is a study of the phenomenological philosophies of Husserl and Heidegger Through a critical discussion including practically all previously published English and German literature on the subject the aim is to present a thorough and evenhanded account of the relation between the two The book provides a detailed presentation of their respective projects and methods and examines several of their key phenomenological analyses centering on the phenomenon of being in the world It offers new perspectives on Husserlian and Heideggerian phenomenology e.g. concerning the importance of Husserl's phenomenology of the body the relationship between the Husserlian concept of constitution and Heidegger's notion of transcendence as well as in its argument that being designates the central phenomenon for both phenomenologists Though the study sacrifices nothing in terms of argumentative rigor or interpretative detail it is written in such a way as to be accessible and rewarding to non specialists and specialists alike

Husserl on Ethics and Intersubjectivity Janet Donohoe, 2016-04-06 This book provides a compelling look at the importance of Husserl's methodological shift from his original purely static approach to his later genetic approach to the analysis of consciousness The author shows that between 1913 and 1921 Husserl progressed in his thinking from a constitutive analysis of how something is experienced which focused primarily on the general structure of consciousness as an abstract unity to an investigation into the origins of the subject as a unique individual interacting with and growing within the surrounding environment This much needed synthesis of Husserl's methodology will be of interest to scholars phenomenologists and philosophers from both continental and analytic schools Martinus Nijhoff, 1853-1953 Martinus Nijhoff Publishers, 1953 **The Working Papers of Hugo Grotius** Martine Julia van Ittersum, 2024-05-27 The Working Papers of Hugo Grotius is the first full length study of the handwritten documents initially used by the author of *Mare Liberum* 1609 and *De Jure Belli ac Pacis* 1625 in his day to day activities as a scholar lawyer and politician but subsequently incorporated into his own or other archives Martine van Ittersum reconstructs a process of transmission dispersal and loss that started during Grotius lifetime and ended with the papers auction in 1864 This is also a study of archival afterlives Our understanding of Grotius life and work is shaped by the conscious decisions of previous generations to retain or discard documents frequently for the sake of individual lives and careers family honour and or larger political and religious ends

The Invention of Infinity: Essays on Husserl and the History of Philosophy Claudio Majolino, 2023-09-29 This book covers Husserl's stance on the philosopher and the history of philosophy whether or not such a history is part of the philosophical attitude itself and if so how Husserl's phenomenology might weigh in on such matters Firstly this text spells out some of the manifold ways in which the history of philosophy works its way in Husserl's phenomenology showing how

concepts methods and problems drawn from various Ancient and Modern philosophical traditions Platonism Aristotelianism Sophistry Stoicism Scholasticism Modern Rationalism are transformed and embedded within transcendental phenomenology itself Secondly it shows how a better understanding of the distinctive patterns by means of which Husserl's phenomenology confronts the history of philosophy could be extremely significant for historians of philosophy who are interested in learning something entirely new about the unexplored horizons of such concepts methods and problems Finally based on such twofold historical and philosophical approach and thanks to a substantial reinterpretation of some key phenomenological concepts such as multiplicity constitution attitude and variation this book provides a novel and original reading of Husserl's overall philosophical project in its full meaning and scope By doing so this volume appeals to both students and researchers and critically engages in mainstream interpretations of phenomenology suggesting a unique take on the idea of transcendental phenomenology as a whole

The Interception of Vessels on the High Seas Efthymios Papastavridis, 2014-08-28 The principal aim of this book is to address the international legal questions arising from the right of visit on the high seas in the twenty first century This right is considered the most significant exception to the fundamental principle of the freedom of the high seas the freedom in peacetime to remain free of interference by ships of another flag It is this freedom that has been challenged by a recent significant increase in interceptions to counter the threats of international terrorism and WMD proliferation or to suppress transnational organised crime at sea particularly the trafficking of narcotics and smuggling of migrants The author questions whether the principle of non interference has been so significantly curtailed as to have lost its relevance in the contemporary legal order of the oceans The book begins with an historical and theoretical examination of the framework underlying interception This historical survey informs the remainder of the work which then looks at the legal framework of the right of visit
