## Lyft Ideas Setup:

Intersection Alisyn Malek, 2021-12-16 Mobility and transportation mean different things to people even to those who work in various aspects of the ecosystem from the movement of people or goods to the development of the infrastructure that enables mobility For decades these different parts of the ecosystem have been approached as entirely independent industries but the quickened pace of technological change has driven the need to reconsider how these distinct groups create the vibrant tapestry that is our mobility ecosystem This book seeks to capture the varied perspectives as a collection of diverse views on the future of mobility to provide a clearer view on the broad base of possibility and opportunity across this interconnected system Contributors Jonathon Baugh Geoffrey Boquot Reilly Brennan Tiffany Chu Jordan Davis Courtney Erlichman Elaina Farnsworth Valerie Lefler Wolfgang Lehmacher Mikail Lind Shoshana Lew Suzanne Murtha Mary Nichols Trevor Pawl John Perrachio Aishwarya Raman Karina Ricks Alex Roy Avinash Ruguboor Anthony Townsend Marla Westervelt and Candace Xie Amazing roster of thought leaders come together to paint a picture of a whole new mobility paradigm in the interest of safety sustainability and equity Sven Beiker PhD Managing Director at Silicon Valley Mobility and Lecturer at Stanford University From Discord to Harmony LaVena Wilkin, Tony Belak, 2020-02-24 This book explores managing workplace conflicts to create harmony It discusses organizational culture diversity and power imbalances emphasizing that effective conflict resolution can transform discord into harmony It provides evidence based strategies and research to help managers handle conflicts productively **The Voltage Effect** John A. List, 2022-02-01 NATIONAL BESTSELLER A leading economist answers one of today's trickiest questions Why do some great ideas make it big while others fail to take off Brilliant practical and grounded in the very latest research this is by far the best book I've ever read on the how and why of scaling Angela Duckworth CEO of Character Lab and New York Times bestselling author of Grit LONGLISTED FOR THE PORCHLIGHT BUSINESS BOOK AWARD Scale has become a favored buzzword in the startup world But scale isn't just about accumulating more users or capturing more market share It's about whether an idea that takes hold in a small group can do the same in a much larger one whether you're growing a small business rolling out a diversity and inclusion program or delivering billions of doses of a vaccine Translating an idea into widespread impact says University of Chicago economist John A List depends on one thing only whether it can achieve high voltage the ability to be replicated at scale In The Voltage Effect List explains that scalable ideas share a common set of attributes while any number of attributes can doom an unscalable idea Drawing on his original research as well as fascinating examples from the realms of business policymaking education and public health he identifies five measurable vital signs that a scalable idea must possess and offers proven strategies for avoiding voltage drops and engineering voltage gains You'll learn How celebrity chef Jamie Oliver expanded his restaurant empire by focusing on scalable ingredients until it collapsed because talent doesn't scale Why the failure to detect false positives early on caused the Reagan era drug prevention program to backfire at scale How governments could deliver

more services to more citizens if they focused on the last dollar spent How one education center leveraged positive spillovers to narrow the achievement gap across the entire community Why the right set of incentives applied at scale can boost voter turnout increase clean energy use encourage patients to consistently take their prescribed medication and more By understanding the science of scaling we can drive change in our schools workplaces communities and society at large Because a better world can only be built at scale
