Why Care? Chris Warner, Caroline Greenlee, Chris Butterworth, 2024-06-03 We live in an ever changing world in which organizations find it increasingly difficult to stay ahead of the changes needed to be successful without thriving people. The authors believe that when people are valued and respected it improves their overall mental well being and workplace experience which in turn makes them more motivated to help meet the purpose and objectives of the organization and adapt to external drivers. This book explores how mental well being and a culture of continuous improvement are intertwined and mutually reinforcing. The authors contend that to create a sustainable culture of continuous improvement there must be an organization wide focus on mental well being at the individual level. A culture of continuous improvement nurtured in the right way however will indeed support mental well being and help create a thriving organization. The key benefit of the book is demonstrating how important mental well being is for sustainable organizational success. It explores this through many different lenses such as the individual, teams, leaders and the organization as a whole and explains the key elements needed for success. Leaders at all levels are able to understand why mental well being is critical and how to nurture it in the workplace. In addition the book explains the importance of diversity, equality, inclusion and belonging and how this is integral to mental well being and a thriving organization. This book provides unique insight into how mental well being and a culture of continuous improvement are intertwined, explaining how thriving people and a thriving culture of continuous improvement create a thriving organization.

Pedagogical Content Knowledge in Teachers' Knowledge for Teaching Science Anne Hume, Rebecca Cooper, Andreas Borowski, 2019-01-28 This book enhances readers' understanding of science teachers' professional knowledge and illustrates how the Pedagogical Content Knowledge research agenda can make a difference in teachers' practices and how students learn science. Importantly it offers an updated international perspective on the evolving nature of Pedagogical Content Knowledge and how it is shaping research and teacher education agendas for science teaching. The first few chapters provide background and introduce a new model known as the Refined Consensus Model (RCM) of Pedagogical Content Knowledge (PCK) in science education and clarify and demonstrate its use in research and teacher education and practice. Subsequent chapters show how this new consensus model of PCK in science education is strongly connected with empirical data of varying nature. The book contains a tailored language to describe the nature of PCK in science education and can be used as a framework for illuminating past studies and informing the design of future PCK studies in science education. By presenting and discussing the RCM of PCK within a variety of science education contexts the book makes the model significantly more applicable to teachers' work.
