Social - Local - Mobile Gerrit Heinemann, Christian Gaiser, 2014-11-20 In the future shopping will be greatly influenced by a combination of localization issues, mobile internet at the point of sale and use of social networks. This book focuses on the SoLoMo synergies that arise from this paradigm shift in future shopping, which also promises new and effective marketing options for traditional retailers. It also reflects the current status of research and business practice, analyzing the basic factors of SoLoMo in detail. The importance of Location based Services (LBS) is elaborated and analyzed in an empirical study using a market based case of KaufDA, a leading German online shopping network. The evidence shows that customers see LBS as an attractive tool and are prepared to change their buying behavior. Though LBS is still in its early stages and its professional longevity remains to be seen, it also promises tremendous potential for the future.

The Science of Successful Organizational Change Paul Gibbons, 2015-05-15 Every leader understands the burning need for change and every leader knows how risky it is and how often it fails. To make organizational change work, you need to base it on science, not intuition. Despite hundreds of books on change, failure rates remain sky high. Are there deep flaws in the guidance change leaders are given? While eschewing the pat answers, linear models and change recipes offered elsewhere, Paul Gibbons offers the first blueprint for change that fully reflects the newest advances in mindfulness, behavioral economics, the psychology of risk taking, neuroscience, mindfulness and complexity theory. Change management, ostensibly the craft of making change happen, is rife with myth, pseudoscience and flawed ideas from pop psychology. In Gibbons' view, change management should be euthanized and replaced with change agile businesses with change leaders at every level. To achieve that, business education and leadership training in organizations needs to become more accountable for real results, not just participant satisfaction, the edutainment culture. Twenty first century change leaders need to focus less on project results, more on creating agile cultures and businesses full of staff who have get to rather than have to attitudes. To do that, change leaders will have to leave behind the old paradigm of carrots and sticks, both of which destroy engagement. New analytics offer more data driven approaches to decision making but present a host of people challenges where petabyte information flows meet traditional decision making structures. These approaches will have to be complemented with leading with science that is using evidence based management to inform strategy and policy decisions. In *The Science of Successful Organizational Change*, you will learn how the VUCA (Volatile, Uncertain, Complex and Ambiguous) world affects the scale and pace of change in today's businesses. How understanding of flaws in human decision making can help leaders guide their teams toward wiser strategic decisions when the stakes are largest, including when to trust your gut and when to trust a model, and when all of us are smarter than one of us. How new advances in neuroscience have altered best practices in influencing colleagues, negotiating with partners, engaging followers, hearts, minds and behaviors, and managing resistance. How leading organizations are making use of the science of mindfulness to create agile learners and agile cultures. How new ideas from analytics, forecasting and risk are

humbling those who thought they knew the future and how the human side of analytics and the psychology of risk are paradoxically more important in this technologically enabled world What complexity theory means for decision making in the context of your own business How to create resilient and agile business cultures and anti fragile dynamic business structures To link science with your on the ground reality Gibbons tells warts and all stories from his twenty plus years consulting to top teams and at the largest businesses in the world You ll find case studies from well known companies like IBM and Shell and CEO interviews from Nokia and Barclays Bank The Oxford Handbook of Ethics of AI Markus Dirk Dubber, Frank Pasquale, Sunit Das, 2020 This interdisciplinary and international handbook captures and shapes much needed reflection on normative frameworks for the production application and use of artificial intelligence in all spheres of individual commercial social and public life Computerworld ,2007-05-07 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld s award winning Web site Computerworld com twice monthly publication focused conference series and custom research form the hub of the world s largest global IT media network Strategic Management Allen Amason, Andrew Ward, 2020-08-10 A focus on creating and sustaining a flow of profitable transactions in other words the creation of sustainable competitive advantage is the seemingly simple yet complex goal of strategic leaders and managers Allen Amason and Andrew Ward approach the topic of strategic management with this focus in mind Rather than simply teaching theory and research Amason and Ward seek to convey the fundamental keys to how strategy works This book is designed to help students think critically and understand fully how to strategically manage their future firms In so doing it will enable them to adapt and learn even as their circumstances change to apply sound logic and reasoning even in new and unfamiliar settings By conveying enduring and fundamental principles of economic and human behavior rather than simply reporting on the latest innovations this book succeeds in preparing students to excel in the business environment over time regardless of how it evolves *Adweek* ,2006 **Everybody's** ,1923 **The Google Guys** Richard L.
