HEALTH  
SCREENINGS**

Some of the preventative care screenings for adults are: breast cancer, colorectal cancer, cervical cancer, prostate cancer, blood pressure, cholesterol, & diabetes.

Preventive care for children helps protect them from serious illnesses & can include screenings to detect behavioral conditions as well.

Preventative care recommended for children can include: routine wellness doctor's visits, vaccinations, behavioral & mental health screenings, & blood tests.

Learning about your family's health history is important! Being aware of a health condition that is in your family, can allow you to participate in health screenings that can detect the condition early. You can also be proactive about engaging in healthy lifestyle choices to prevent these conditions from developing or getting worse. One of the best things you can do for your health and well-being is to get screened for any serious conditions before they happen.
