Visual Methods for Digital Research Sabine Niederer, Gabriele Colombo, 2024-06-19 Over the last decade images have become a key feature of digital culture at the same time they have made a mark on a wide range of research practices. *Visual Methods for Digital Research* is the first textbook to bring the fields of visual methods and digital research together. Presenting visual methods for digital and participatory research, the book covers both the application of existing digital methods for image research and new visual methodologies developed specifically for digital research. It encompasses various approaches to studying digital images including the distant reading of image collections, the close reading of visual vernaculars of social media platforms and participatory research with visual materials. Offering a theoretical framework illustrated with hands-on techniques, Sabine Niederer and Gabriele Colombo provide compelling examples for studying online images through visual and digital means and discuss critical data practices such as data feminism and digital methods for social and cultural research. This textbook is an accessible and invaluable guide for students and researchers of digital humanities, social sciences, information and communication design, critical data visualization and digital visual culture.
