Doordash Prices Setup:

The Fight Against Platform Capitalism Jamie Woodcock, 2021-03-02 So far platform work has been an important laboratory for capital Management techniques like the use of algorithms are being tested with a view to exporting across the global economy and it is argued that automation is undermining workers agency Although the contractual trick of self employment has allowed platforms to grow quickly and keep their costs down yet it has also been the case also that workers have also found they can strike without following the existing regulations This book develops a critique of platforms and platform capitalism from the perspective of workers and contributes to the ongoing debates about the future of work and worker organising It presents an alternative portrait returning to a focus on workers experience focusing on solidarity drawing out a global picture of new forms of agency In particular the book focuses on three dynamics that are driving struggles in the platform economy the increasing connections between workers who are no longer isolated the lack of communication and negotiation from platforms leading to escalating worker action around shared issues and the internationalisation of platforms which has laid the basis for new transnational solidarity Focusing on transport and courier workers online workers and freelancers author Jamie Woodcock concludes by considering how workers build power in different situations Rather than undermining worker agency platforms have instead provided the technical basis for the emergence of new global struggles against capitalism
