It explores the evolving world of digital marketing, moving beyond the traditional tools into a more technology-based approach. This book not only shows the successful case studies but also the challenges faced in online marketing, highlighting the lessons learned and the adaptability required in this rapidly changing environment. **MOVE** Tim Lewko, 2025-11-21 Developed by Tim Lewko, a 25-year strategy veteran, **MOVE** shows leaders how to embed artificial intelligence (AI) directly into the strategy process and validate strategic bets, pressure test assumptions, and adapt faster than the competition while maintaining control over final decisions. Traditional strategy frameworks cannot keep up with trade wars, supply chain disruptions, and shifting consumer behaviour, and leaders can no longer afford to wait for annual planning cycles or lengthy strategy retreats. **MOVE** responds to this rapid change by simplifying strategy into a clear, repeatable system of seven essential tools, all powered by AI to accelerate decision making and execution. It's a practical, leadership-owned operating system that aligns strategic assumptions, project prioritization, and quarterly execution cycles. Through examples, this book reveals how AI can power real-time data analysis, surface critical indicators that signal when a strategic bet is veering off course, and show when emerging threats require immediate attention. In a rapidly changing world, **MOVE** is a key tool for senior executives, business leaders, board members, CEOs, Presidents, and P.L. owners to regain control across the entire execution cycle.

**The Social-Structural Determinants of Health** Sofie Hass, Jessica R. Corno, Aida Wisecup, 2025-07-29 Today more than ever, society is faced with the unequivocal question of developing a better understanding of the interconnectedness between social forces, environmental experiences, and the outcomes of mental and physical health and well-being. Post-COVID-19 considerations have led to an unprecedented need to establish a more interdisciplinary understanding of the role that social construction has on health and illness and the diverse set of ways that our social world plays in the identification, treatment, and experience of various diseases and health-related conditions. Social life is intricately linked to quality of life variables related to health, both mental and physical. Thus, we recognize the

invaluable contribution to the field of medicine made by a comprehensive understanding of health wellness and social functioning as a byproduct of the study of the human body and mind However we posit that this knowledge would be incomplete without examining the close relationship between health wellness and those aspects of social environment that create conditions that can either strengthen or undermine the wellbeing of individuals groups of people and entire communities the social structural determinants of health
