**Continuous Learning in Organizations** Valerie I. Sessa, Manuel London, 2015-06-03 There is already considerable literature on learning at the individual level and a growing body of literature on group and organizational learning But to date there has been little attempt to bring these literatures together and link learning at all three levels Continuous Learning in Organizations targets learning at each of the three levels and demonstrates how processes at one level impacts learning at other levels At the heart of the work is the idea that individuals groups and organizations are living systems with internal learning mechanisms that can be activated and supported or stymied and thwarted Once activated systems can learn adaptively by reacting to a change in the environment they can learn by generating new knowledge and conditions and or they can transform by creating and applying frame breaking ideas and bringing about radically new conditions Individuals groups and organizations are nested within each other forming an increasingly complex hierarchy of intertwined systems From this point of view the book describes the interactions between the levels and how developmental processes at one level affect learning at other levels The text appeals to both the scientist and professionals alike in the fields of human resource development training management and executive education coaching and organization change and development It is also for executives who establish directions for learning and need to convince others that continuous learning is the key to on going success of their enterprise
