G. Bell,2003 There are very few radiology multiple choice question books on the market that reflect the current trends and developments in the field of imaging. Hence the emphasis of this book is on cross sectional CT and MR imaging. It highlights the current understanding and concepts in the state of the art imaging of a wide range of diseases in the body. The multiple choice questions are organised according to body systems and imaging modalities. There are twelve sections in the book testing the reader in a broad range of imaging knowledge. The questions are accompanied by expanded answers which provide the reader with a summary of the key facts relating to a particular topic. This is especially useful in assisting the reader in consolidating his or her understanding of the subject. The questions are devised in a format similar to those encountered in the Part 2A examination of the Royal College of Radiologists UK and the Part 2 examinations of the Joint Australian and New Zealand College of Radiology.
