Multiple Choice Questions in Science and Mathematics for Engineering J. O. Bird, 1996-01-01 Engineering GNVQs require students to take multiple choice test papers for all units. This new series of photocopiable question banks provides copious material for students to practice this style of question. The questions are presented in the form of 14 model test papers each comprising 20 questions as the GNVQ tests do. Answers are printed at the back of the book. The pilot GNVQ has revealed that many students found particular difficulties in tackling multiple choice style questions in maths and science. Used flexibly for tests and practice exercises this pack will be the key to success in the GNVQ tests for many students.

The British National Bibliography Arthur James Wells, 2001 **Advanced GNVQ Engineering Mathematics** J. C. Yates, 1995 A Spreadsheet Approach to Maths for GNVQ Engineering Rosamund Sutherland, Daniel Howell, Alison Wolf, 1996 This unique text uses tried and tested methods developed by the authors during a recent Nuffield Foundation project set up to investigate maths needs for GNVQ. Most areas of engineering mathematics are well suited to the spreadsheet approach and many students find the techniques easier to handle than more conventional computational methods. This text covers spreadsheet procedures for application of number core skills and about two thirds of the areas of maths needed for the GNVQ Maths for Engineering advanced unit but does not attempt to cover those problems more sensibly tackled by conventional means. By attempting the questions and assignments within the book the student compiles a record of competence suitable for inclusion in the portfolio and assessment. To this end worked examples have solutions but answers to all other exercises are to be found in the lecturers guide available free to teaching staff only. Maths for Engineers covers the mathematical requirements of the GNVQ intermediate mandatory and optional units for engineering. The requirements of the key skill Application of Number are also met in this essential text up to and including level 4. Detailed basic mathematics. Progressive developments of mathematical concepts and skills through text and exercises. Applications of scientific concepts and skills

Maths for Intermediate GNVQ Application of Number Ewart Smith, 1995 Ewart Smith makes the core skill Application of Number fascinating. By relating maths directly to the careers of GNVQ students he builds readers interest in the vital skills. Maths for Intermediate GNVQ provides a new kind of challenge. With simple questions the author persuades students to show mathematical competence they did not realise they possessed
