Meadowlark Economics Collected Essays On Ecology Community And Spirituality:

Meadowlark Economics James Eggert, 2009 Alarmed by the disappearance of meadowlarks from the fields near his home James Eggert embarked on a close study of the economic and ecological factors behind the loss. His inquiry led him to conclude that the meadowlark's survival is a metaphor for ours that our future is intimately linked to the same interplay of economics culture technology and spirituality. In this innovative educational book Eggert helps readers understand how our environment is connected to in fact a vital part of our economy and business culture. In the title essay Eggert critiques free market capitalism borrowing from Thoreau as he investigates what he calls meadowlark values in education and business. The author highlights the preciousness of the Earth itself and persuasively describes the creative possibilities in using science culture evolutionary history and spiritual traditions to gain a deeper understanding of how we might heal the planet. A foreword by environmentalist Bill McKibben and an afterword by renowned Buddhist thinker Thich Nhat Hahn add context to this authoritative supplement to current economics texts.

Meadowlark Economics: Collected Essays James Eggert, 2024-01-05 Foreword By Bill This is an unusual and valuable book in many respects. Its author of course is an economist but not one devoted to the prevailing theology of his profession. Economists mostly work with the dedication of beavers or bees toward the great goals of More Growth expansion and acceleration are the sacred words of their creed. And they have been enormously successful their faith has spread around the world crowding out all other creeds. And yet there is always something rather well dismal about the field. This comes I think from its disciples firm determination to wall off certain questions. For instance What makes for happiness Or How do I figure out what I want from life. They can answer these only by pointing to our consumer behavior. We must want what we buy. But they must sense the tautological absurdity of that line of argument. Now comes James Eggert one of a small school of economists who has begun to think outside the box. And it is curious that he soon delves deeply into a concept long used by his tribe value. In his essay Meadowlark Economics Eggert inscribes it marvelously with real meaning instead of the stale and transactional definition to be found in the front of the Econ textbooks. The meadowlark's song is pleasing his color and swoop of flight enchanting. Suddenly we are using good old nouns and adjectives the sweet and solid Anglo Saxon words instead of the ponderous Latinate syllables of the professional journal. These things are a form of wealth and are valuable he insists. And if you assign them a value in your heart then you are in a position to begin to assess both the positives and the negatives of economic growth. The so called efficiency for instance of the modern farm which leaves no room for the meadowlarks to nest and fledge their young is but one of many examples. Eggert's book will be of great use to all who read it. But it would be especially helpful though subversive to give it to anyone you know who is an economist. It will help them see among other things that grasping onto the conventional economic orthodoxy not only shows a certain blindness but can also unfortunately turn out to be tragic. From Kirkus Reviews This collection of thoughtful essays weaves together economic and ecological issues. While Eggert is an

economist by trade he is struck by the relationship between economics and ecology I believe these two households are becoming more interdependent he writes and their futures more and more intimately linked Indeed each of the 21 elegantly written essays in this revised collection has a strong eco conscious component The unusual title is derived from the author s concern over the Midwest s loss of meadowlarks somewhat esoterically he translates this occurrence into meadowlark values suggesting that a meadowlark economist must seriously try and incorporate an ecological consciousness and ecological values along with market thinking and market values Eggert s essays are as soaring and aspirational as they are instructional and practical For example in What s Wrong with Capitalism he notes there is a destructive quality in capitalism that often violates the ecological laws that can and should ensure life s beauty balance health and long term continuity In perhaps his most novel essay Wal Mart Pond Eggert cleverly combines ecology and economy by imagining a conversation with Henry Thoreau His final essay Quartet is most worthy of contemplation what is our part in the music of the cosmos what is our role in the harmony of nature s variations on a theme At times poetic and philosophical even as the author remains firmly planted on terra firma The British National Bibliography Arthur James Wells,2009 *The Canadian Environmental Education Catalogue* Pembina Institute for Appropriate Development,1995 An annotated guide to environmental education materials

Richard Rohr,Shephali Patel,Lyla June Johnston,2016-09-01 The Zen Master Thich Nhat Hanh was asked what we need to do to save our world What we most need to do he replied is to hear within us the sound of the earth crying Our present ecological crisis is the greatest man made disaster this planet has ever faced its accelerating climate change species depletion pollution and acidification of the oceans A central but rarely addressed aspect of this crisis is our forgetfulness of the sacred nature of creation and how this affects our relationship to the environment There is a pressing need to articulate a spiritual response to this ecological crisis This is vital and necessary if we are to help bring the world as a living whole back into balance The first edition of this book published in 2013 fostered the emergence of the Spiritual Ecology Movement which recognizes the need for a spiritual response to our present ecological crisis It drew an overwhelmingly positive response from readers many of whom are asking the simple question What can I do The 2016 expanded edition offers new chapters including two from younger authors who are putting the principles of spiritual ecology

into action working with their hands as well as their hearts It also includes a new preface and revised chapter by Llewellyn Vaughan Lee that reference two major recent events the publication of Pope Francis's encyclical *On Care for Our Common Home* which brought into the mainstream the idea that the ecological crisis is essentially a spiritual problem and the 2015 Paris Climate Change Conference which saw representatives from nearly 200 countries come together to address global warming including faith leaders from many traditions And in Autumn 2021 we have issued a new edition with a new updated preface from editor Llewellyn Vaughan Lee who has also rewritten his chapter *The Call of the Earth* Bringing together voices from Buddhism Sufism Christianity and Native American traditions as well as from physics deep psychology and other environmental disciplines this book calls on us to reassess our underlying attitudes and beliefs about the Earth and wake up to our spiritual as well as physical responsibilities toward the planet It's hard to imagine finding a wiser group of humans than the authors represented here all of them both thinkers and doers in the greatest battle humans have ever faced AN EPIC COLLECTION BILL MCKIBBEN founder 350.org *Spiritual Ecology* is a superb collection of thoughtful pieces by people who have gone deep to understand our relations with the Earth It comes at a crucial time for humanity BARRY LOPEZ landscape photographer and author *Arctic Dreams* winner National Book Award Of *Wolves and Men* *Crossing Open Ground About This Life* THIS BOOK PROVIDES FRESH THINKING about the spiritual approaches of consciously and consistently making the right choices each of us within our respective sphere of influence As the world works towards a new global climate agreement in 2015 it is in our interest and in the interest of future generations to reflect on how we can individually and collectively contribute to addressing climate change by making our economies and lifestyles more sustainable because solving climate change can help solve many of the issues the earth currently faces Climate change is therefore both a challenge and an opportunity I hope this book inspires and energizes many readers eager to rise to the greatest challenge ever to face humanity by realizing the transformative opportunities we have in front of us CHRISTIANA FIGUERES Former Executive Secretary of the United Nations Framework Convention on Climate Change UNFCCC **Place, Ecology and the Sacred** Michael S. Northcott, 2015 People are born in one place Traditionally humans move around more than other animals but in modernity the global mobility of persons and the factors of production increasingly disrupts the sense of place that is an intrinsic part of the human experience of being on earth Industrial development and fossil fuelled mobility negatively impact the sense of place and help to foster a culture of placelessness where buildings fields and houses increasingly display a monotonous aesthetic At the same time ecological habitats and diverse communities of species are degraded Romantic resistance to the industrial evisceration of place and ecological diversity involved the setting aside of scenic or sublime landscapes as wilderness areas or parks However the implication of this project is that human dwelling and ecological sustainability are intrinsically at odds In this collection of essays Michael Northcott argues that the sense of the sacred which emanates from local communities of faith sustained a parochial ecology which over the centuries shaped communities that

were more socially just and ecologically sustainable than the kinds of exchange relationships and settlement patterns fostered by a global and place blind economy. Hence Christian communities in medieval Europe fostered the distributed use and intergenerational care of common resources such as alpine meadows, forests or river catchments. But contemporary political economists neglect the role of bounded places and spatial limits in the welfare of human and ecological communities. Northcott argues that place based forms of community dwelling and exchange such as a local food economy more closely resemble evolved commons governance arrangements and facilitate the revival of a sense of neighbourhood and of reconnection between persons and the ecological places in which they dwell

Spiritual Ecology Llewellyn

Vaughan-Lee, 2016-09-01 A call to heal the Earth through spiritual awareness and action. This collection of essays explores the spiritual dimensions of the ecological crisis offering a path towards reconnection and sustainability. Leading voices from Buddhism, Sufism, Christianity and Indigenous traditions unite to address our forgetfulness of nature's sacredness. They offer insights on climate change, species loss and deforestation, urging a reassessment of our beliefs about the Earth. Discover how to cultivate compassion, embrace indigenous wisdom and transform consciousness to create a more balanced world. This expanded edition includes new perspectives from younger authors putting spiritual ecology into action. It is for anyone seeking a deeper connection with nature and a more meaningful response to the environmental challenges of our time.

Common Goods Melanie Johnson-DeBaufre, Catherine Keller, Elias Ortega-Aponte, 2015 In the face of globalized ecological and economic crisis what role does political theology play in formulating the shared good and the sharing of goods? This remarkable collection of essays by philosophers, theologians and religion scholars together rethinks the common experimentally assembling a transdisciplinary political theology of the earth

Meadowlark Economies Jim

Eggert, 2017-09-04 First Published in 2017 The author shares their feelings about enjoying and preserving the natural environment yet this book also reveals a conflict in values that the most committed ecologist must face. Such conflict pits the powerful American values of individual freedom and rights against the values of community necessary for sustaining the environment. In publishing this collection of essays the author hopes to contribute to more enlightened economic analysis and more relevant and effective policies that are good for both the economy and the global ecology

Spiritual Ecology

Llewellyn Vaughan-Lee, 2016-09-01 Spiritual Ecology The Cry of the Earth is a groundbreaking book fostering the emergence of the Spiritual Ecology Movement which recognizes the need for a spiritual response to our present ecological crisis. Bringing together voices from Buddhism, Sufism, Christianity and Native American traditions as well as from physics, deep psychology and other environmental disciplines this book calls on us to reassess our underlying attitudes and beliefs about the Earth and wake up to our spiritual as well as physical responsibilities toward the planet. This is vital and necessary if we are to help bring the world as a living whole back into balance. The first edition of Spiritual Ecology 16 000 copies sold drew an overwhelmingly positive response from readers many of whom are asking the simple question What can I do? This second

expanded edition offers new chapters including two from younger authors who are putting the principles of spiritual ecology into action working with their hands as well as their hearts It also includes a new preface and revised chapter by Llewellyn Vaughan Lee that reference two major recent events the publication of Pope Francis s encyclical On Care for Our Common Home which brought into the mainstream the idea that the ecological crisis is essentially a spiritual problem and the 2015 Paris Climate Change Conference which saw representatives from nearly 200 countries come together to address global warming including faith leaders from many traditions Spiritual Ecology speaks with the voices of many different traditions but with the single note of love for the Earth and the knowing that Her cry has begun to be heard **Meadowlark**
