Measurement in Sport and Exercise Psychology Gershon Tenenbaum, Robert Charles Eklund, Akihito Kamata, 2012

Measurement in Sport and Exercise Psychology provides a complete analysis of the tools and methods used in sport and exercise psychology research. Each chapter of this accessible text presents key measurement variables and concepts including their definitions, an evaluation of the measurement constructs and tools available, and an explanation of any controversies in each topic. The text includes access to an online resource that presents 14 measurement instruments in their entirety. Drawing on their experience as leading researchers in the field, editors Tenenbaum, Eklund, and Kamata have selected a team of recognized scholars to bring both breadth and depth to this essential resource. By thoroughly examining each measurement tool, Measurement in Sport and Exercise Psychology assists readers in determining strengths and limitations of each tool and discovering which tools are best suited to their research projects. Readers will also gain critical knowledge to expand the field by recognizing opportunities for new methods of measurement and evaluation. The text begins with a historical review of measurement in sport and exercise psychology, followed by a comprehensive description of theories and measurement issues. It provides detailed information regarding ethical and cultural issues inherent in the selection of specific testing protocols, as well as issues in interpreting meta-analysis. This is followed by discussion of the commonly used constructs and inventories in three areas: cognition, perception, and motivation; measurement of emotion, affect, and coping; and social and behavioral measurement. Recommendations for researchers and practitioners included at the end of each chapter provide starting points for considering ways to incorporate chapter content into research projects and professional practice. Tables located at the end of each chapter summarize key information for quick reference and provide online sources when available so that readers can access each measurement tool. Original source information is provided for those tools not available online. Measurement in Sport and Exercise Psychology assists readers in evaluating the effectiveness of specific measurement tools. As the most complete and up-to-date directory of tools and inventories in the field of sport and exercise, this text offers a thorough explanation of considerations, controversies, recommendations, and locations for accessing these measurement tools.
