**The Design Guidelines Collaborative Framework** Stefano Filippi, Ilaria Cristofolini, 2009-12-04 In the industrial design and engineering field product lifecycle product development design process Design for X etc constitute only a small sample of terms related to the generation of quality products Current best practices cover widely different knowledge domains in trying to exploit them to the best advantage individually and in synergy Moreover standards become increasingly more helpful in interfacing these domains and they are enlarging their coverage by going beyond the single domain boundary to connect closely different aspects of the product lifecycle The degree of complexity of each domain makes

impossible the presence of multipurpose competencies and skills there is almost always the need for interacting and integrating people and resources in some effective way These are the best conditions for the birth of theories methodologies models architectures systems procedures algorithms software packages etc in order to help in some way the synergic work of all the actors involved in the product lifecycle This brief introduction contains all the main themes developed in this book starting from the analysis of the design and engineering scenarios to arrive at the development and adoption of a framework for product design and process reconfiguration In fact the core consists of the description of the Design GuideLines Collaborative Framework DGLs CF a methodological approach that generates a collaborative environment where designers manufacturers and inspectors can find the right and effective meeting point to share their knowledge and skills in order to contribute to the optimum generation of quality products

web sep 17 2022 figure 2 2 2 this is a picture of an inconsistent linear system the vector  $\mathbf{w}$  on the right hand side of the equation  $x_1\mathbf{v}_1 + x_2\mathbf{v}_2 = \mathbf{w}$  is not in the span of  $\mathbf{v}_1, \mathbf{v}_2$  convince yourself of this by trying to solve the equation  $x_1\mathbf{v}_1 + x_2\mathbf{v}_2 = \mathbf{w}$  by moving the sliders and by row reduction compare this with figure 2 2 1
