**Communications/Media/Geographies** Paul C. Adams,Julie Cupples,Kevin Glynn,André Jansson,Shaun Moores,2016-09-19 Although there are human geographers who have previously written on matters of media and communication and those in media and communication studies who have previously written on geographical issues this is the first book length dialogue in which experienced theorists and researchers from these different fields address each other directly and engage in conversation across traditional academic boundaries

The result is a compelling discussion with the authors setting out statements of their positions before responding to the arguments made by others One significant aspect of this discussion is a spirited debate about the sort of interdisciplinary area that might emerge as a focus for future work Does the already established idea of communication geography offer the best way forward If so what would applied or critical forms of communication geography be concerned to do Could communication geography benefit from the sorts of conjunctural analysis that have been developed in contemporary cultural studies Might a further way forward be to imagine an interdisciplinary field of everyday life studies which would draw critically on non representational theories of practice and movement Readers of Communications Media Geographies are invited to join the debate thinking through such questions for themselves and the themes that are explored in this book for example of space place meaning power and ethics will be of interest not only to academics in human geography and in media and communication studies but also to a wider range of

scholars from across the humanities and social sciences *Contemporary Challenges in Mediatisation Research* Katarzyna Kopecka-Piech, Göran Bolin, 2023-04-03 This book focuses on key challenges related to conducting research on mediatisation presenting the most current theoretical empirical and methodological challenges and problems addressing ignored and less frequently discussed topics critical and controversial themes and defining niches and directions of development in mediatisation With a focus on the under representation of certain topics and aspects as well as methodological technological and ethical dilemmas the chapters consider the main critical objections formulated against mediatisation studies and exchange critical positions Moving beyond areas of common focus culture sport and religion to emerging areas of study such as fashion the military business and the environment the book then offers a critical assessment of the transformation of fields and the relevance of new and dynamic meta processes including datafication counter mediatisation and platformisation Charting new paths of development in mediatisation this book will be of interest to scholars and students of mediatisation media studies media literacy communication studies and research methods

**The Decolonial Turn in Media Studies in Africa and the Global South** Last Moyo, 2020-09-09 This book develops a nuanced decolonial critique that calls for the decolonization of media and communication studies in Africa and the Global South Last Moyo argues that the academic project in African Media Studies and other non Western regions continues to be shaped by Western modernity's histories of imperialism colonialism and the ideologies of Eurocentrism and neoliberalism While Africa and the Global South dismantled the physical empire of colonialism after independence the metaphysical empire of epistemic and academic colonialism is still intact and entrenched in the postcolonial university's academic programmes like media and communication studies To address these problems Moyo argues for the development of a Southern theory that is not only premised on the decolonization imperative but also informed by the cultures geographies and histories of the Global South The author recasts media studies within a radical cultural and epistemic turn that locates future projects of theory building within a decolonial multiculturalism that is informed by trans cultural and trans epistemic dialogue between Southern and Northern epistemologies

**Electronic Elsewheres** Chris Berry, So-yöng Kim, Lynn Spigel, 2010 Some chapters were previously published [Digital Inequalities in the Global South](#) Massimo Ragnedda, Anna Gladkova, 2020-06-29 This book discusses how digital inequalities today may lead to other types of inequalities in the Global South Contributions to this collection move past discussing an access problem a binary division between haves and have nots to analyse complex inequalities in the internet use benefits and opportunities of people in the Global South region Using specific case studies this book underlines how communities in the Global South are now attempting to participate in the information age despite high costs a lack of infrastructure and more barriers to entry Contributions discuss the recent changes in the Global South These changes include greater technological availability the spread of digital literacy programs and computer courses and the overall growth in engagement of people from different backgrounds ethnicities and languages in digital environments This book

outlines and evaluates the role of state and public institutions in facilitating these changes and consequently bridging the digital divide    **Restricted Access** Elizabeth Ellcessor,2016-03-29 How reconsidering digital media and participatory cultures from the standpoint of disability allows for a full understanding of accessibility While digital media can offer many opportunities for civic and cultural participation this technology is not equally easy for everyone to use Hardware software and cultural expectations combine to make some technologies an easier fit for some bodies than for others A YouTube video without closed captions or a social network site that is incompatible with a screen reader can restrict the access of users who are hard of hearing or visually impaired Often people with disabilities require accommodation assistive technologies or other forms of aid to make digital media accessible useable for them Restricted Access investigates digital media accessibility the processes by which media is made usable by people with particular needs and argues for the necessity of conceptualizing access in a way that will enable greater participation in all forms of mediated culture Drawing on disability and cultural studies Elizabeth Ellcessor uses an interrogatory framework based around issues of regulation use content form and experience to examine contemporary digital media Through interviews with policy makers and accessibility professionals popular culture and archival materials and an ethnographic study of internet use by people with disabilities Ellcessor reveals the assumptions that undergird contemporary technologies and participatory cultures Restricted Access makes the crucial point that if digital media open up opportunities for individuals to create and participate but that technology only facilitates the participation of those who are already privileged then its progressive potential remains unrealized Engagingly written with powerful examples Ellcessor demonstrates the importance of alternate uses marginalized voices and invisible innovations in the context of disability identities to push us to rethink digital media accessibility
