that factors in both macro and micro processes that are dynamically interconnected interdependent and continuously evolving and changing to account for the impact of media on modernity and development Media impact according to this model should be understood not only in terms of the socio economic and psychological characteristics of the media audience but also in terms of the dynamics of the whole socio cultural and political system Kazan concludes his study with a critique of the Western paradigm of development and presents the outline of a new paradigm of development that is more in harmony with the new physics with the ecosystems and with social justice
