Media Law Reg European Union 98:

European and International Media Law Jan Oster, 2017 This unique textbook offers a comprehensive overview of European and international media law and how globalised communication has shaped it Media Law in the time of liquid modernity Jacek Sobczak, Jędrzej Skrzypczak, Ksenia Kakareko, 2017 Political and social changes that took place at the turn of the 20th and 21st centuries and additionally technological revolution and the process of digitalisation have resulted in significant social economic and legal transformations Then it can be even said metaphorically that together with the development of the Internet we discovered a new continent Colonization of this area resembles conquering new areas in times of great geographical discoveries At first power and violence were prevailing and only later people tried to introduce effective methods of law enforcement Nowadays the next problem is the non territoriality of phenomena on the Internet From the point of view of legal actions it is generally limited to a legal system of a given country and seems to be a fundamental issue As it appears law and legal systems do not handle the challenges of global space and it is rather a gunslinger's speed that turns out to be essential here However it should be hoped that with time as in the case of the real world experience power will be replaced with powerful arguments based on effective legal mechanisms in particular All the more so as these changes happen very rapidly Thus referring to the known concept of liquid modernity by Zygmunt Bauman it can also be said that by regulating the media subject in the field of law to fundamental changes we are confronted with the uncertainty of legal institutions concerning this part of social life Hence we should return to the basics and again pose fundamental questions about media law such as for instance what should the press radio television be called and who can be treated as a journalist Additionally we should face new legal phenomena and challenges The collective work we are passing to the readers is an attempt to analyse the current state and present a forecast about further changes as well as answers to at least several questions posed above Being aware of the fact that it is impossible to deal with or even settle all the aforementioned problems in such a study the editors hope that thanks to reviews and deliberations of the authors the book will significantly contribute to the discussion on media law in the 21st century The authors of individual chapters of this book are researchers from various Polish scientific institutions and members of the Polish PressLawAssociation *Media Law and Regulation in the European Union* Manny Paraschos, 1998 Media Regulation in the European Union presents an anthology of the most important laws and regulations affecting journalism and the media in the European Union It also covers relevant decisions of the European Court of Human Rights These laws are presented in historical sociopolitical and media contexts and are compared with their equivalent in the United States The book generally looks at national country specific legislations and transnational European Union wide regulations Specifically the book addresses constitutional press or expression provisions personal protections morality and security issues access to information and secrecy Considerable attention is paid to the regulation of broadcasting and to the rules governing those who own the media and those who help sustain them advertisers

and the advertising industry The book's last chapter discusses media self regulation and includes the codes of ethics of the professional journalists organizations of the European Union member nations **European and International Media Law** Perry Keller, 2011-05-12 Over the past half century western democracies have lead efforts to entrench the economic and political values of liberal democracy into the foundations of European and international public order As this book details the relationship between the media and the state has been at the heart of those efforts In that relationship often framed in constitutional principles the liberal democratic state has celebrated the liberty to publish information and entertainment content while also forcefully setting the limits for harmful or offensive expression It is thus a relationship rooted in the state's need for security authority and legitimacy as much as liberalism's powerful arguments for economic and political freedom In Europe this long running endeavour has yielded a market based liberal democratic regional order that has profound consequences for media law and policy in the member states This book examines the economic and human rights aspects of European media law which is not only comparatively coherent but also increasingly restrictive rejecting alternatives that are well within the traditions of liberalism Parallel efforts in the international sphere have been markedly less successful In international media law the division between trade and human rights remains largely unabridged and in the latter field liberal democratic concepts of free speech are influential but rarely decisive In the international sphere states are moreover quick to assert their rights to autonomy Nonetheless the current communications revolution has overturned fundamental assumptions about the media and the state around the world eroding the boundaries between domestic and foreign media as well as mass and personal communication European and International Media Law sets legal and policy developments in the context of this fast changing globalized media and communications sector American Book Publishing Record ,2001

Cumulated Index to the Books ,1999 *Contentious Regions in the European Union* Álvaro Morcillo Laiz, 2009 This dissertation gauges the influence of regions from EU decentralized member states on European policies The ability of regions to shape EU decisions has been at the center of discussions on European integration theory and of EU politics for fifteen years now By combining evidence from German Italian and Spanish federalism and from two EU policy areas audiovisual and cohesion the author shows why and when understanding EU policies requires taking regional lobbying of the European Parliament and the Commission into consideration This first attempt to combine the literature on The Europe of the Regions and on multi level governance with policy analysis will be illuminating for scholars and practitioners interested in the EU decision making process as well as for those concerned with Europeanization Dissertation **Data Protection in a Post-Pandemic Society** Chaminda Hewage, Yogachandran Rahulamathavan, Deepthi Ratnayake, 2023-07-11 This book offers the latest research results and predictions in data protection with a special focus on post pandemic society This book also includes various case studies and applications on data protection It includes the Internet of Things IoT smart cities federated learning Metaverse cryptography and cybersecurity Data protection has burst onto the computer security scene due to the
