Payments* William S. Comanor,2004 The delinquent payment of child support by non custodial to custodial parents is a major  
problem throughout the United States To many observers the problem is one of deadbeat dads men who simply will not make  
the required payments The solution has been to enforce payment by the imposition of increasingly stringent civil and criminal  
penalties Despite these efforts the percentage of single mothers receiving child support has changed very little over the past  
twenty five years The Law and Economics of Child Support Paymentsinvestigates why this is and approaches the payment of  
child support as an economic problem To understand the issues involved leading lawyers and economists examine various  
facets of the child support system from a law and economics perspective They consider the incentives faced by both custodial  
and non custodial parents and search for policy actions that are more incentive compatible for all participants The  
assumptions underlying current child support guidelines are discussed as are the ways in which child support payments  
affect family structure teenage delinquency and income disparities between parents This comprehensive provocative volume  
will be of considerable interest to policymakers lawyers and parent advocacy groups as well as to students of this timely issue
