healthy self is defined by its relationship with its human spiritual and ecological communities Here Crawford brings together first hand accounts personal experience and narrative observations of Native American religion and healing to present a richly textured portrait of the intersection of tradition cultural revival spirituality ceremony and healing These are not descriptions of traditions isolated from their historical cultural and social context but intimately located within the communities from which they come These portraits range from discussions of pre colonial healing traditions to examples where traditional approaches exist along with other cultural traditions both Native and non native At the heart of all the essays is a concern for the ways in which diverse Native communities have understood what it means to be healthy and the role of spirituality in achieving wellness Readers will come away with a better understanding not just of religion and healing in Native American communities but of Native American communities in general and how they live their lives on an everyday basis
