today is such a procedure allowed There are special courses in chemistry in which this field work as it may be called is not only permissible but highly desirable And so it is in botany In the general courses the pupil must have his material supplied to him in such quantities and at such times that he may make his studies in their right sequence and with no delay This in brief should be the work of the pupil in high school botany About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works **Nature-Study Review, Vol. 14** ,2018-01-30 Excerpt from Nature Study Review Vol 14 Devoted Primarily to All Scientific Studies of Nature in Elementary Schools January 1918 A tree lover s tribute to her favorites of the field and woodland during their season of Winter reist A book that will be treasured by all out door lovers About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works **Bulletin** ,1909

Office of Education,1909 *Nature-Study Review, Vol. 17* ,2015-07-20 Excerpt from Nature Study Review Vol 17 Devoted to Elementary Science in the Schools The construction of a sun dial and the setting it up properly should be a delightful means of educating the pupils in a very important subject the measuring of time a subject which is given very little thought in this day of clocks and watches Even during the discussion of time saving turning back the clock an hour very few understood its real meaning Sun dials are very ancient of origin and probably the earliest form was a pole fixed in the ground with the spaces covered by its shadow during the day divided and marked by stones or in some other manner The earliest mention of a sun dial is found in Isaiah xxxviii 8 Behold I will bring again the shadow of the degrees which is gone down in the sun dial of Ahaz ten degrees backward This must have been written about 700 years B C but we have no idea of the form of this dial The earliest dial the construction of which we know was made by the Chaldean astronomer Berossus who lived about 300 B C and it consisted of a hollow hemisphere with its rim horizontal and a bead fixed at its center which cast a shadow the path of which was an arc which was divided into twelve equal parts This form of dial was used many centuries by many peoples No one knows certainly when the first clock was invented nor by whom but

The Nature-Study Review, Vol. 1 American Nature Study Society, 2017-12-26 Excerpt from The Nature Study Review Vol 1 Devoted to All Phases of Nature Study in Elementary Schools January 1905 In attempting to frame a definition of nature study I may be undertaking something which cannot be accomplished to the satisfaction of every one and yet all will agree I think that the subject must be more sharply and clearly stated if we would have it productive of the most good in our schools One has only to look over the literature of nature study to see how varied are the standpoints of different teachers with reference to the subject Some teachers hold that the chief object of nature study or science for they use the terms interchangeably is the acquisition of facts and consequently fill the course of study with a mass of materials which are to be studied in a scientific manner Other teachers hold that the subject is valuable chiefly for its training of the mind and senses and for its power to arouse an interest in and love for the world about us With the first class the subject matter and its manner of presentation are all important with the second class the subject matter is considered immaterial as long as the desired training of the senses is brought about The extremes of these two schools are far apart and represent radically different standpoints but there are many intermediate views held About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
