Rethinking the Concept of Law of Nature Yemima Ben-Menahem, 2022-06-13 This book subjects the traditional concept of law of nature to critical examination. There are two kinds of reasons that invite this reexamination: one deriving from philosophical concerns over the traditional concept, the other motivated by theoretical and practical changes in science. One of the philosophical worries is that the idiom of law of nature especially when combined with the notion of laws governing individual events and processes is no longer as intelligible as it used to be in the theistic context in which the formulation of laws became central to science. The traditional concept is also challenged in various ways by contemporary scientific theories such as quantum mechanics, chaos theory, and the general theory of relativity. It is no longer clear that there are any universal laws; laws do not always guarantee predictability and the border between physical and mathematical considerations is constantly shifting. The most difficult challenge perhaps is to come up with a scientific explanation of the origin of laws. Wrestling with these intriguing problems, the papers in this volume broaden both our understanding of the natural order and our desiderata of scientific explanation.

Political Economy, Race, and the Image of Nature in the United States, 1825–1878 Evan Robert Neely, 2024-05-01 Political Economy, Race, and the Image of Nature in the United States 1825–1878 is an interdisciplinary work analyzing the historical origins of a dominant concept of Nature in the culture of the United States during the period of its expansion across the continent. Chapters analyze the ways in which Nature became a discursive site where theories of race and belonging, adaptation and environment, and the uses of literary and pictorial representation were being renegotiated, forming the basis for an ideal of the human and the nonhuman world that is still with us. Through an interdisciplinary approach involving the fields of visual culture, political economy, histories of racial identity, and ecocritical studies, the book examines the work of seminal figures in a variety of literary and artistic disciplines and puts the visual culture of the United States at the center of intellectual trends that have enormous implications for contemporary cultural practice. The book will be of interest to scholars working in art history, visual culture, American studies, environmental studies, ecocriticism, critical race theory, and semiotics.

The Natural Environment in Late Byzantine Correspondence Kalliope Mavrommati, 2025-10-10 This book investigates environmental issues traced through the epistolography of the late Byzantine period, which spans roughly the end of the twelfth century to the mid fifteenth century. The book's overarching goal is to shed light on the complex ways in which the Byzantines conceptualised their connection to the natural world, both in broad strokes and in finer granularity, and to provide a general understanding of societal dependence on the environment. It offers further details of this relationship by drawing on a wide variety of literary sources as well as archaeological and environmental data.

The Nature of Natural History Marston Bates, 2014-07-14 This classic work is an exploration of what natural history is and a sustained effort to see how it relates to other areas of biology. Marston Bates did not attempt to overwhelm his audience with facts or overinterpret those he did use, and perhaps for this reason *The Nature of Natural*

History is a timeless work. The author's genuine interest in the tropics has a very current feeling and the first ten or fifteen chapters of the work have a style that is parallel to that of David Attenborough's verbal presentations of nature. From the book I have already made several remarks about the connection between parasitism and degeneracy. I suspect this is a matter of point of view. We are predatory animals ourselves and consequently admire the characteristics of predation: agility, speed, cunning, self-reliance. We feel a certain kinship with the lion and regard the liver fluke with horror. If a sheep were given the choice though, it might prefer to be debilitated by liver flukes rather than killed by a lion. Originally published in 1990, The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905. **Holistic Bioethics** Jude Thaddeus Buyondo, 2024-10-31. In pursuing a holistic bioethics while dialoguing with different sciences, appreciation of moral affinities between human and nonhuman entities, Dr. Buyondo argues for a minimum moral status for nonhuman entities. The minimum normative basics of approaches to biomedical ethics are at the very least not distinctive to either human animals or nonhuman animals only. The investigation builds further on the African understanding of life where no creation is lifeless. In establishing a more inclusive functional bioethics, the African approach goes further than biocentrism, ecocentrism, and holism to ground an inclusive African holistic moral egalitarianism, suggesting that all forces and all created things have life. We are not emphasizing how every system and creature command equal respect; rather, everything has life, commands respect, and moral concern as a minimum imperative within a Black African holistic approach to bioethics. However, holistic bioethics can neither be Western nor an African invention; that people of other cultures only admire it from a distance. Moreover, holistic bioethics doesn't offer the last word on the ethics of nonhuman animals; holistic anamnetic solidarity, the relational Other, and intercultural theological bioethics.

This is a collection of excerpts from the public addresses of Robert F. Goheen during his twelve years as President of Princeton University. The emphasis is on the people whose responsibility it is to promote and defend the principles underlying the modern American university: students, faculty, administrators, trustees, alumni. Several

fundamental themes emerge the theme of individual responsibility and the ever present need to join rational intelligence with moral commitment for example Dr Goheen sees the university as a continuing institution with long range goals responding conservatively in its best sense to the human needs of the times He seeks to define its institutional relationships in the context of the university s tasks in education and research which must be understood and kept in balance if universities are to serve their functions effectively Originally published in 1969 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **Cretaceous Period: Biotic Diversity and Biogeography** Ashu Khosla,Spencer G.
